64021 PRECISION 90T

MSRP: \$2595.95

The CYCLOPS is a compact, light weight sound and flash suppressor designed to reduce the sound and visible flash signature of both action and single shot rifles chambering the .50 BMG cartridge. The revolutionary design of the CYCLOPS significantly reduces felt recoil, environmental disturbance, and preserves the hearing of shooters and observers by delivering an overall sound signature well below the pain threshold and risk level for hearing loss. The CYCLOPS is constructed of specially heat treated high strength alloys and is CNC turned welded to yield a structure that can withstand the extreme pressures of the .50 BMG cartridge.

The CYCLOPS couples to a proprietary muzzle brake using a durable ACME type thread and a spring biased secondary latch, allowing users to install or remove the suppressor in less than 10 seconds, ROT fast attach. Both the suppressor and muzzle brake are finished in Matte Black.

Muzzles NOT included

CALIBER	WEIGHT	LENGTH	DIAMETER
.50 BMG	4 lbs 15 ounces	15.0" (16.0" extend)	3.0"

Muzzle NOT included.

CALIBER	WEIGHT	LENGTH	DIAMETER
