How do you ensure that people feel safe in their environment, whilst also maintaining operational excellence? Secure is a new solution which benefits both businesses and consumers, tracking real-time occupancy and monitoring ambience, water, waste, carbon emissions and energy consumption, all under one dashboard.

Secure is a innovative platform designed to meet the emerging facility management requirements offering landlords and property managers real-time data to enable efficient decision making. With a key focus on Data Analytics, Digital Twin and ESG, Secure captures, collates and manages extensive and diverse information and delivers it in an easy-to-use format.

## Futureproof your buildings and manage operations remotely

## Data analytics

Secure reports on your data aggregated from disparate building systems, providing insights into usage such as energy consumption, occupancy and sanitization.
