## About SCENTA

Established in 2008, **SCENTA**, as a professional brand of aroma diffusers, has rich experience in this industry. As a pioneering scent delivery system manufacturer, SCENTA is staffed with a strong scientific and research team and equipped with advanced technologies and machines. So far, we have owned cutting-edge atomizing technologies: Nanotechnology and Twin-fluid spray technology. Our aroma diffusers are designed to deliver natural fragrance, therefore providing a comfortable and relaxing fragrance experience for users.

After over 13 years' development, SCENTA has set up our own R&D center, consisting of several experienced and high-educated R&D engineers. We have a creative design team, consisting of several professional product designers and graphic designers. It is their creative ideas that help SCENTA develop so many unique and attractive aroma diffusers. Also, we have a large area of over 8000m<sup>2</sup>, equipped with advanced machines like laser printing machines and UV printing machines. With high-tech automatic machines and professional workers, SCENTA can totally satisfy the logo customization needs of customers.

Relying on good quality, appealing look, and practical function, our products are widely welcomed and accepted by customers engaged in industries, like hospitals, hotels, restaurants, shopping malls, and other public places. At present, SCENTA has exported our aroma diffusers and other machines to many different countries and regions, mainly including Europe, America, and the Middle East.

SCENTA aims to benefit every customer with our unique scent delivery system and scent marketing strategy.
