Description

Product Introduction:

SSS copper oxide grade non-woven fabric
Filters out dust, odors and particles
Meltblown filter layer
Double-layer meltblown cloth
electrostatic adsorption is safer
Copper oxide skin-friendly non-woven fabric
Our Premium health protection masks have ≥ 95% filtration efficiency, so they provide effective respiratory health protection.
The filter efficiency greater than or equal to 95%, which greatly prevents unfiltered air from entering directly, could be protected from dust, small particles of air, pollen and much more and can protect you at critical moments.

Do whatever you want and create a better new life
