SKU: ATS Category: [Uncategorized](#)

Description

Reviews (1)

- With high-quality stainless-steel tube encapsulation, the item is waterproof, moisture proof, rust-proof.
- It can measure the temperature directly in the water.
- With pull-up resistor on board, the adapter module can be connected directly to most microcontrollers.
- It is widely used in temperature monitoring for fish tanks, equipment, machinery, greenhouses.

Please note that due to limitations in photography and the inevitable differences in monitor settings, the colors shown in the photography may not correspond 100% to those in the items themselves.

PROMPT AND CARING CUSTOMER SERVICE
