Lifetime Green Coatings is an eco-friendly epoxy alternative floor coating for your home or business.

Put an End to Unsafe, Unsightly Floors

In Your Home

- Has your epoxy floor discolored, chipped, peeled, or flaked?
- Is your garage an eyesore?
- Do you need to waterproof your basement or crawl space?
- Does your garage floor live up to its potential?

[Residential](#)

At Your Business

- Is your flooring a liability risk, causing safety hazards?
- Are your floors and other critical surfaces degrading?
- Tired of combating mold and bacteria in your facility?
- Do you need safe flooring for plants and livestock?

What Makes Lifetime Green Coatings so Different?

We understand how important something as simple as a floor surface can be. Don't settle for subpar results from epoxy and paint. These treatments don't deliver the lasting, **gorgeous results you'll enjoy** with Lifetime Green Coatings.

- **100% made in the USA** – Since we manufacture our own material, there's no lag time for products to be delivered. This also saves money by cutting out a 3rd party distributor.
- **Self-Leveling and Anti-Slip** –Lifetime Green Coatings self-levels to help fill in worn, uneven gaps in concrete, and includes a natural aggregate giving you a level, slip-resistant floor.
- **Save Your Back** – Everyone dreads cleaning out their garage – so we'll do it for you! For a small fee, we will move your belongings to a safe storage pod, plus we will even move them back afterwards.
- **We Clean Up** – Unlike some companies that back charge you when they leave their junk behind, we don't leave any hazardous materials or trash for you to clean up.
