

# STREAK

## VISUAL AMMUNITION™

### TOMORROW'S AMMUNITION TODAY.

STREAK's exclusive patented technology allows the shooter to visually see the projectile's path toward its target. STREAK rounds are nonincendiary. They do not generate heat so they are safe to use in environments where tracers are prohibited and can become a serious fire hazard. The results are game-changing in many aspects for the consumer, law enforcement, and military. For indoor range use and low light shooting.

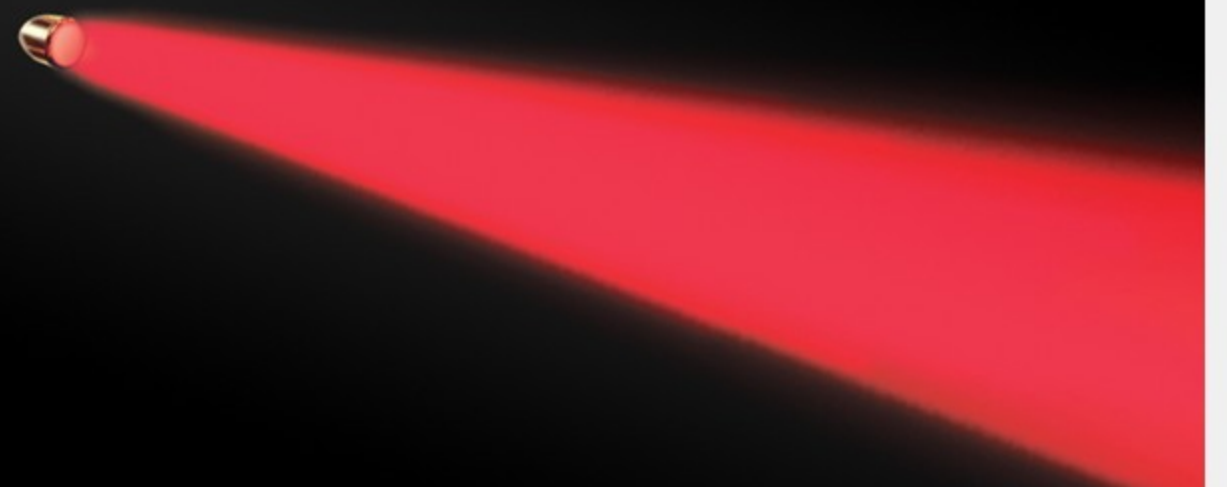

"IT'S LIKE SHOOTING WITH LASER BEAMS"

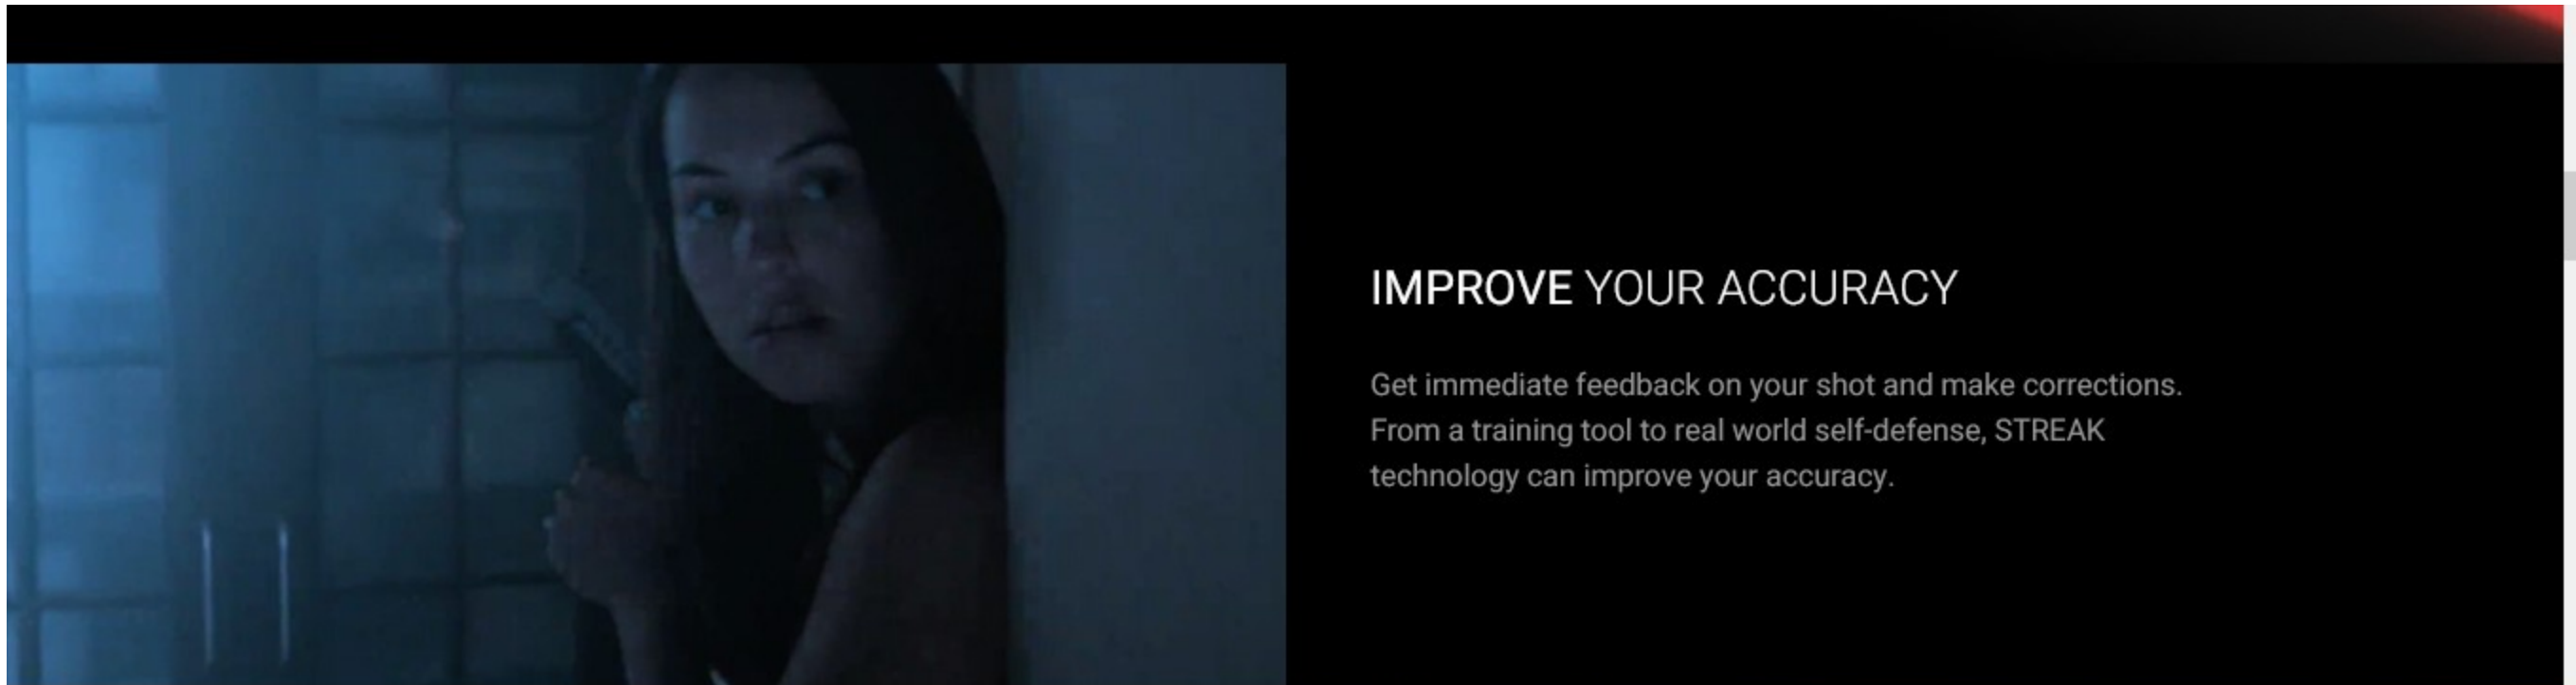

[SEE STREAK IN ACTION](#)

### SEE YOUR BULLET PATH

Our exclusive STREAK technology is only visible within 30° of the shooter's point of view. This means you can see the STREAK, but it doesn't point back to your position.

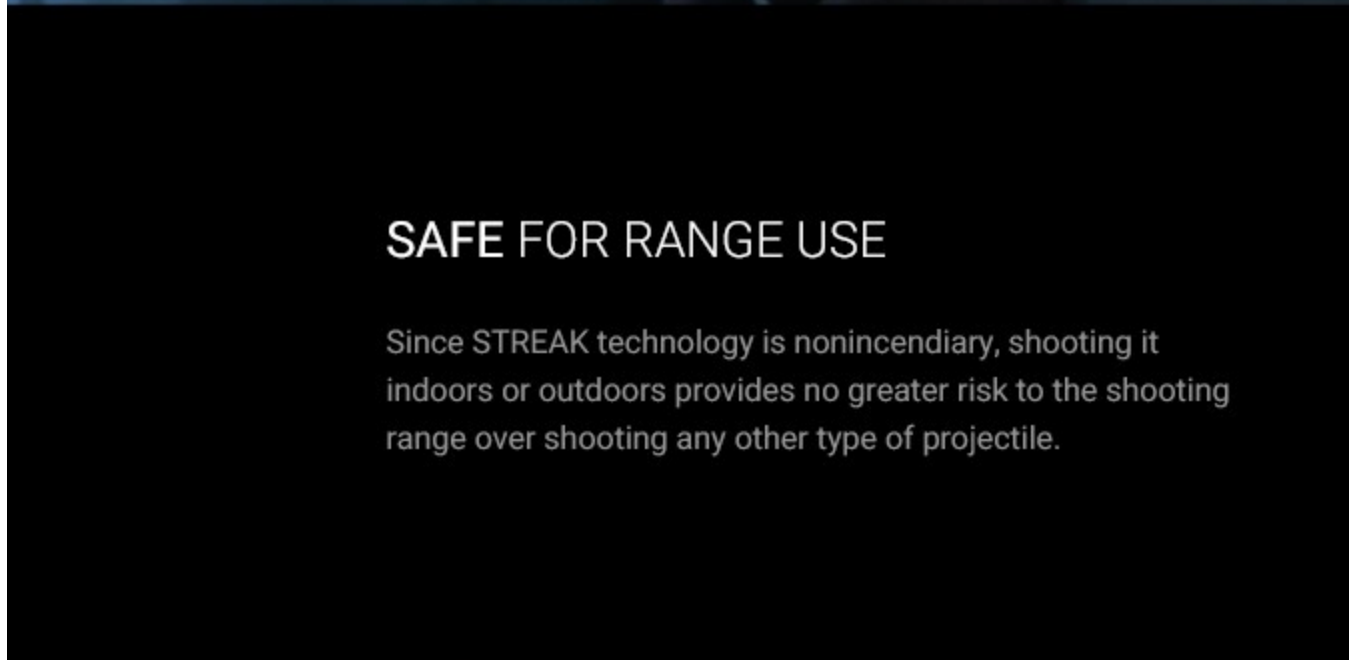

## IMPROVE YOUR ACCURACY

Get immediate feedback on your shot and make corrections. From a training tool to real world self-defense, STREAK technology can improve your accuracy.

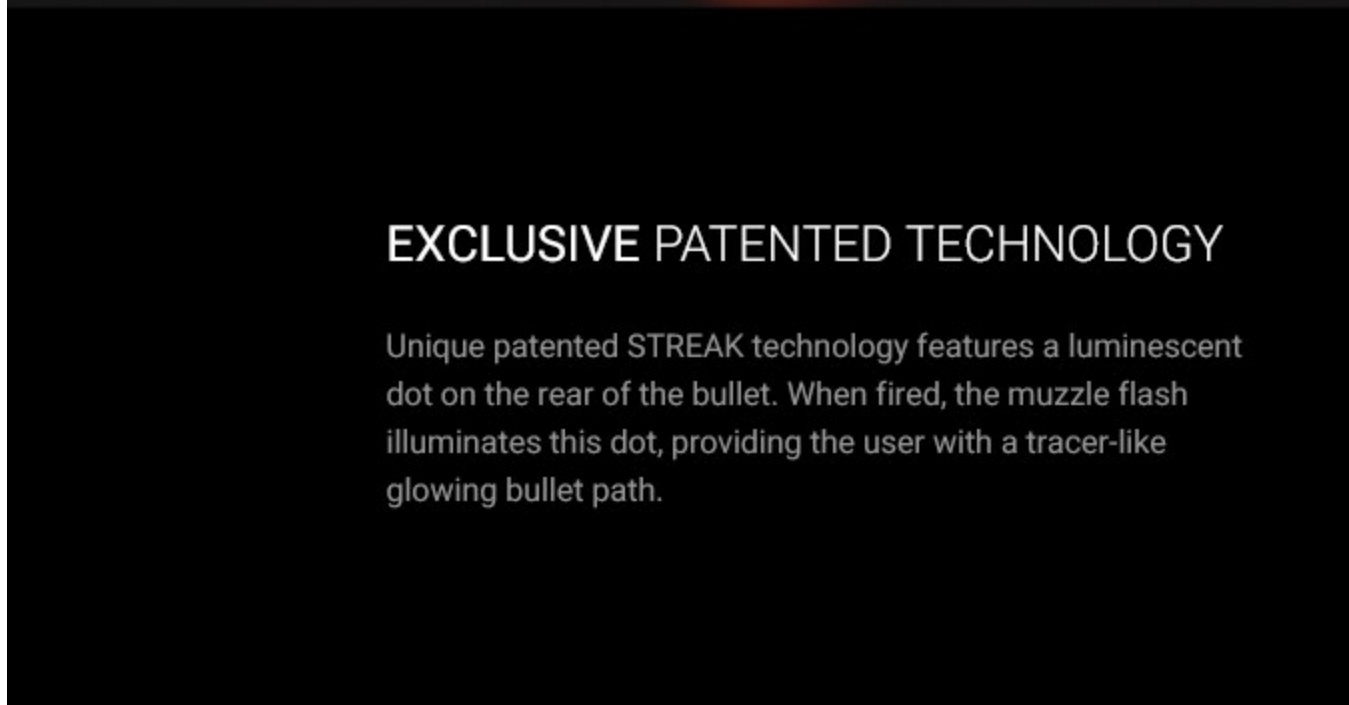

## SAFE FOR RANGE USE

Since STREAK technology is nonincendiary, shooting it indoors or outdoors provides no greater risk to the shooting range over shooting any other type of projectile.

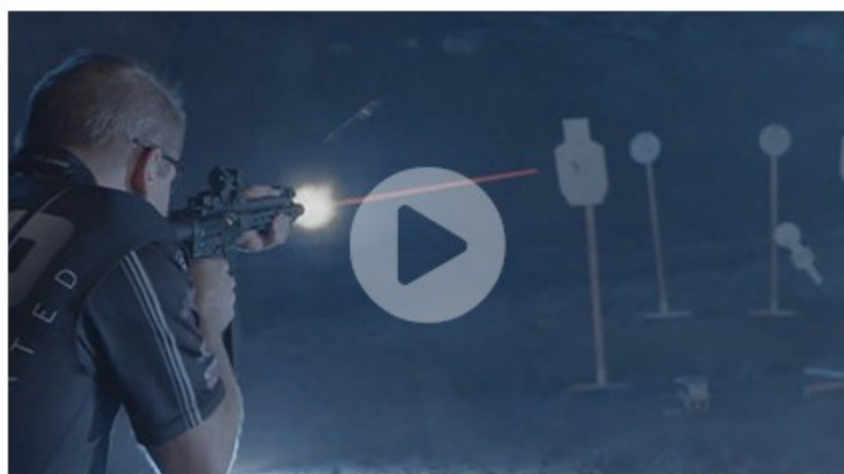

## NONINCENDIARY PROJECTILES

Unlike traditional tracer ammunition, STREAK does not generate heat. This removes the fire risks associated with shooting tracer ammunition. STREAK ammunition is safe for indoor and outdoor shooting environments.

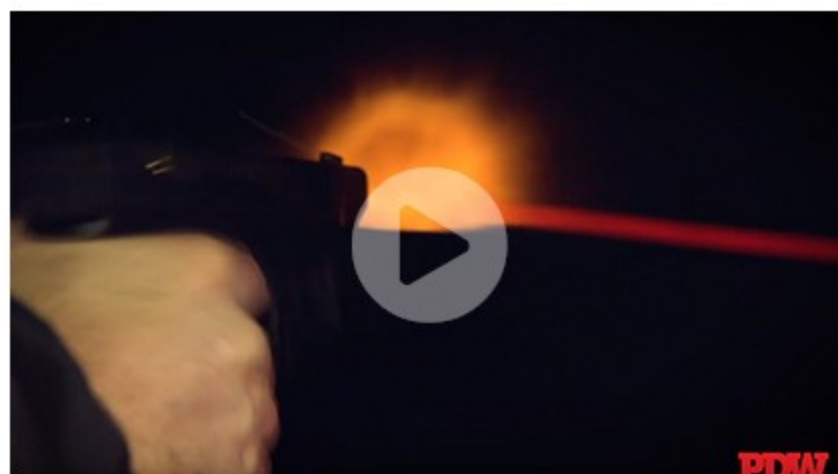

## EXCLUSIVE PATENTED TECHNOLOGY

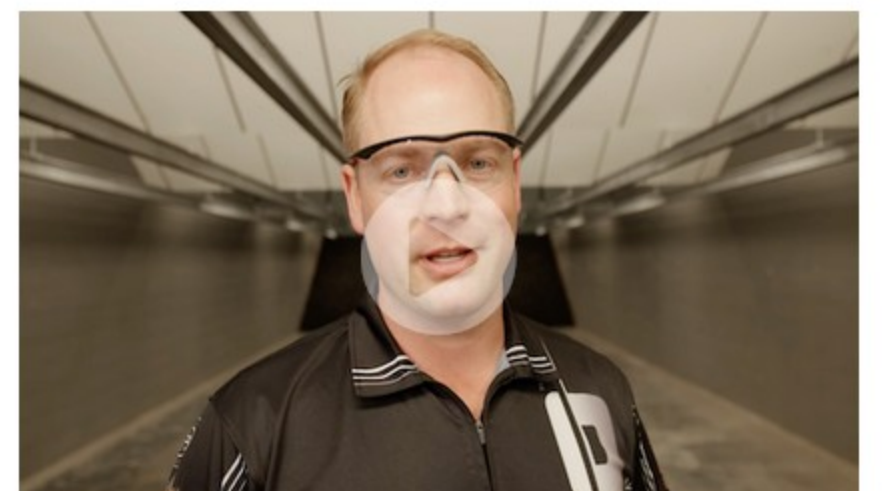

Unique patented STREAK technology features a luminescent dot on the rear of the bullet. When fired, the muzzle flash illuminates this dot, providing the user with a tracer-like glowing bullet path.

☆☆☆☆☆ Write a review

/20 round box

Part #: 38125JHP-STRK-RED

STREAK .38 Special 125 gr Jacketed Hollow Point - Red

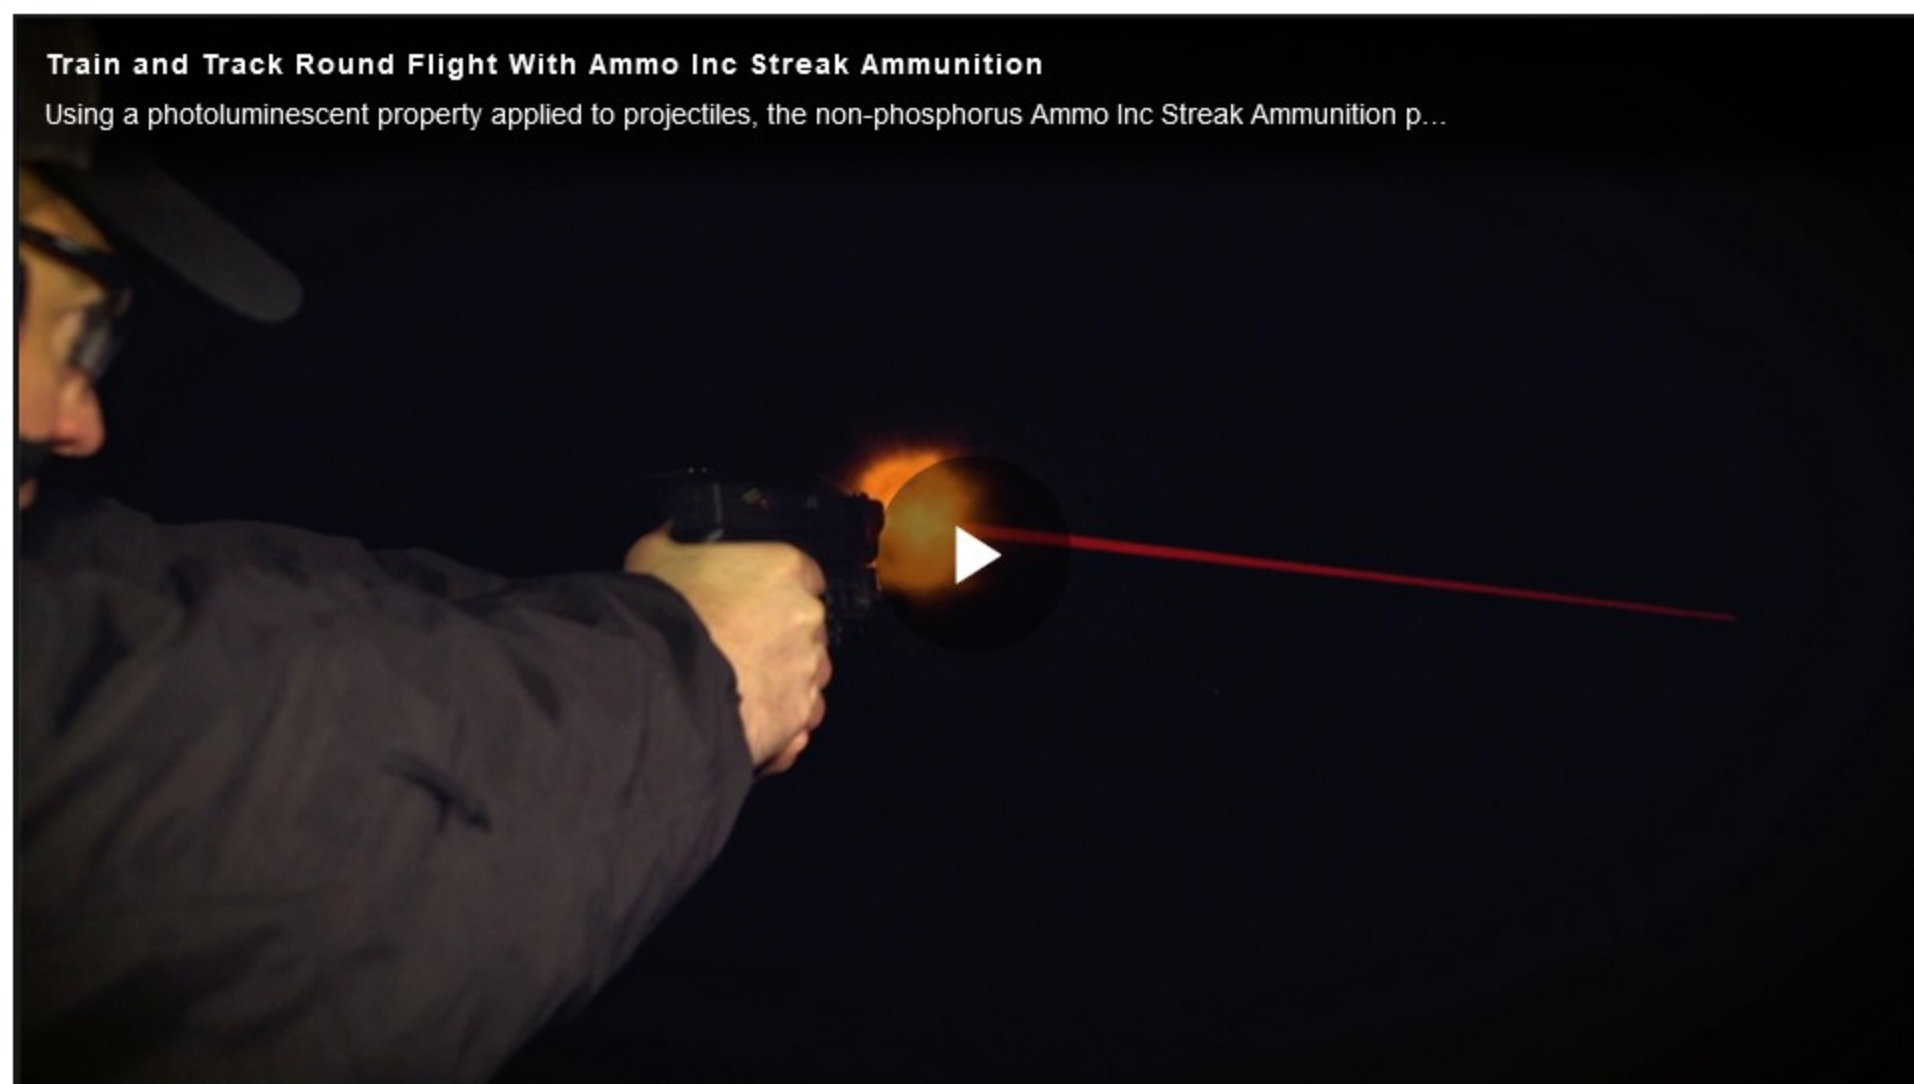

Caliber	.38 Special
Bullet Type	Jacketed Hollow Point
Bullet Weight	125 gr
Application	Target/Personal Protection
Muzzle Velocity	950 fps.

### FEATURES

- Patented technology allows the shooter to keep a visual on the projectile's path toward its target
- Next Generation, non flammable visual tracer-style ammunition - because it is not an incendiary round, it's safe for both indoor and outdoor use
- Features HyperClean Technology up to 50% less cleaning time
- Increase shooting enjoyment and accuracy

### DESCRIPTION

Ammo, Inc. STREAK Visual Ammunition's exclusive and patented technology allows the shooter to visually see the projectile's path towards its target. STREAK rounds are non-incendiary, meaning they don't generate heat and thus are safe to use in environments where traditional tracers are prohibited and can be a serious fire hazard. The results are game-changing in many aspects for the consumer, law enforcement and military. For indoor range use and nighttime shooting.
