

# Treat herpes quickly and discreetly.

## VALACYCLOVIR (GENERIC VALTREX)

### WHAT IT IS

— An oral antiviral medication that treats herpes either when an outbreak occurs, or on a daily basis to prevent outbreaks by suppressing HSV-1 and HSV-2.

### WHAT IT DOES

- Decreases severity, length, and frequency of outbreaks
- Helps sores heal faster & prevents formation of new sores
- Decreases pain & itching
- May decrease number of outbreaks by 70-80%
- Reduces transmission of genital herpes by 50%

GET HERPES TREATMENT

## Treatment options & pricing

You can elect to use valacyclovir to treat individual outbreaks as they occur or you can take valacyclovir daily to prevent outbreaks, which is typically recommended if you experience frequent and/or severe outbreaks or want to reduce the risk of transmitting herpes to a partner.

Connect with a doctor today to determine what plan is best for you.

### FOR OUTBREAKS

Take valacyclovir as needed within 1 day of noticing symptoms.

### FOR PREVENTION

Take valacyclovir daily to stop outbreaks from occurring.

**Pricing without insurance**  
(out-of-pocket)

\$13/month  
(\$39/delivery for 3 months supply)

\$23/month  
(\$69/delivery for 3 months supply)
