Description [Reviews \(0\)](#)

The 6.56 x 6.56 ft blue and orange tarpaulin provides the best shelter for any of your belongings with great protection from UV rays, rain, dust and more. It has good anti-aging ability and long service life.

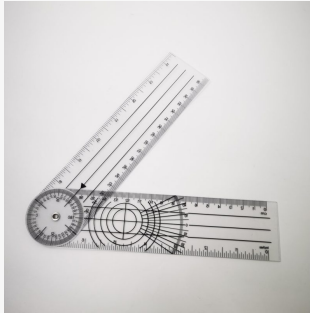

All our tarpaulins are made of 100% polyethylene, which is corrosion resistant and odor free. High-density weaving, double-sided coating, durable, enhanced water resistance.

The four corners of the tarpaulin are added with a PP protective layer, which makes the tarpaulin firmer, with even force, and is not easy to be damaged by pulling. The use of galvanized buttonholes is not easy to rust, and can well fix the tarpaulin.

Made of high quality materials and craftsmanship, our tarpaulins are very easy to fold for easy storage.

You can use this tarp to cover many different objects such as roofs, boats, swimming pools, patios. It is also possible to provide a shelter for items stored outdoors.
