Product Details

New Muscle Back design. The P120 52° PW is only the size of the sweetspot forcing the brain and eyes to focus at higher levels, so when you transition back to your own clubs they are much easier to hit. Because your focus is on such a small sweetspot you will see instant improvement in your ball striking, confidence, consistency and accuracy when you switch to your own clubs! By forcing you to focus at higher levels Pure One improves ball striking, tempo and accuracy. Used consistently for warm up and practice before you play will result in improved distance, accuracy and ball striking! Shaft flex availability is: Steel Regular Flex or Steel Stiff Flex or Pure Tempo Super flex. See the drop down section of this order page.
