City, Zip or Name

In addition to treatment, I offer genetic testing for clients to identify treatment responses to specific medications, based on DNA, and come up with an individualized treatment plan. In consideration of clients' busy schedules, family, work responsibilities, I also offer telemedicine and can schedule virtual appointments for routine and follow-up care.

I look forward to helping you live in a more productive and meaningful way. My goal is to integrate positive and effective treatments into your life. Book an appt online by clicking "website".
