The objective of the Women in Hunting Initiative is to engage with and create opportunities for women who belong to, or who wish to join, the hunting and conservation community. The Initiative aims to provide women with resources, support and mentorship, in collaboration with the broader hunting and conservation community.

Engage with the Women in Hunting Committee and participate in a focus group discussion to contribute your experiences and ideas. Help to inform the types of resources and support you would value and discuss how to enhance the engagement of women interested in hunting and conservation, demystify hunting and create pathways to our community. While the focus of the group discussion is on women, men are welcome and invited to attend and contribute!
