★★★★★

Hallo, Also ich habe zwar 6 Wochen auf das E-Fatbike gewartet und heute ist es endlich angekommen, aber das Warten hat sich gelohnt, dass Bike ist Super. Ich habe es gleich zusammengebaut und meine erste Probefahrt war auch recht gut. Das Bike fuhr immer gute 26 km/h, aber dann habe ich einwandig am Display rumgefummelt mal eine andere Einstellung und sehe da, dass Bike fuhr, 86 km/h. Also ich bin mit dem Bike sehr zufrieden. Ein ganz großen dank an Buybestgear

Love it !  
Comfortable even tall as 1,90m,  
Good speed, good breaks, smart delivery,  
easy set up.  
Juste miss an USB connection ...

★★★★★

-Vélo 'polyvalent'. Je recommande.  
-Autonomie en tout électrique, environ 30km en assistance niveau 5 (35/30km/h)  
-Autonomie avec assistance au pédalage niveau 2/3, environ 70/80 km (15/20km /h)  
-Vitesse max batterie chargée sur le plat en mode tout électrique : 35km/h (et 30km/h batterie à 50% et moins). La version 2 du lo. 26 est bridée a 35km/h (même en changeant les réglages de l'écran ce sera sa vitesse maximale).  
-Pliable, rentre dans le coffre d'une voiture (avec un des sieges arrière pli...

Dommage qu'il y ait des éraflures sur le panier avant et sur la fourche arrière au niveau de la béquille  
Sinon le velo répond bien à la description et à mes attentes  
Pour les éraflures, peut-être avez vous une bombe de peinture pour faire des retouches ?  
Merci  
Cordialement

Je suis très satisfaite de mon achat.  
Fiabilité, robustesse, esthétique, performance, autonomie de la batterie rien à redire, tout est plus que satisfaisant.  
Néanmoins quelques points à revoir sur la conception du vélo concernant le repli de celui-ci. L'étrier de frein avant cogne sur le châssis. Il serait judicieux de prévoir une butée pour empêcher toutes dégradations et prévoir aussi un verrouillage des éléments afin de les solidariser et faciliter le chargement du vélo replié en voiture.
