SIGHTING MIRRORS FOR GUNS RIFLE SCOPE, HUNTING RIFLE SCOPE, MIL DOT RETICLE, SPRING LOADED INSTANT ZERO RESETS TURRETS, 7MM SUNSHADE, IPX6 WATERPROOF, SHOCKPROOF

Sighting mirrors for guns

- Mil-Dot reticle; provide bright and vivid pictures; estimate the distance and lock the target quickly to ensure accurate aiming
- . Sunshade included; prevent specular reflection of light and resist viewing errors caused by strong light
- . AO function; adjustable target from 10 yards to infinity; suitable for short-range aiming; the closest focusing distance is 10 yards
- Robust design: made of aluminum alloy and constructed with the ultra strong one-piece tube: waterproof and anti-fog
- 1/4 MOA elevation and windage adjustments; 20mm ring mounts adapt to 20mm Picatinny and Weaver rails

Product Description

Adjustable Windage Elevation

The Turrets for windage and elevation are smooth and click into place nicely and are marked so that it's easier to sight in the scope at different yardages

Eyepiece diopter adjustment

It can be rotated to adjust the diopter, suitable for people with different eyesight. It's more comfortable to watch, and you can see a wider range

Parallax adjustment

Adjustable target for 10 yards to infinity - perfect for close up. Nearest Focusing Distance is 10 YDS. You can see more precise targets by adjusting the objective
