Description **Reviews (0)**

CROWN synthetic resins are almost odorless, non irritating, safe and environmentally friendly, and you can use it with confidence.

It is not easy to produce bubbles during solidification, or the bubbles will be eliminated by themselves after pouring into the mold. Make the finished product more perfect.

The setting time of our unprocessed synthetic resin is about 8-48 hours. After solidification, it is crystal clear, beautiful as crystal, with high hardness and good fall resistance.

It is resistant to aging, yellowing, high temperature and durability. The finished product can be cut and polished, presents perfect works for you. Your friends and relatives will be very happy to receive your DIY gift.

The operation steps are very simple: first, weigh the two resins you need, then mix them, stir them evenly, add decorations, pour them into the mold, wait for 8-48 hours to solidify, and then demould.
