Website Design for Law Firms

We make lawyers look good.

It's not enough to simply have a website—it has to be easy on the eyes, well-organized, informative, engaging, compelling, fast, functional, in line with your firm's brand, and appealing to search engines.

- ☑ Eye-catching designs
- ☑ Mobile friendly and fast loading
- ☑ Built with industry leading WordPress software
- ☑ You have complete ownership of your website

Firms We Have Worked With

Our Approach to Law Firm Website Design

A website is no longer an option—it's a necessity. When someone is looking for legal representation, the internet is their first stop. If you don't have an online presence, you're virtually invisible. And even if a potential client does find you in some other way, you can bet they'll eventually seek out your website to learn more about your firm and make sure you're "legit."

Discovery & Planning

This step builds the foundation and outline we'll use to create your firms new website. A few questionnaires and meetings and we'll be on the right track.

Design

Our eye-catching, modern and professional designs will look great on any device and set you apart from your competition.

Theme Development

We'll use WordPress to build your mobile friendly website theme based. Once this framework is in place we can build out all the needed pages for your site.

Site Build

Easy on the eyes, well-organized, informative, engaging, compelling, fast, functional, in

Finalize & Launch

Our battle tested quality assurance process makes sure no detail falls through the cracks

Maintenance & Support

Not even the best designed website will deliver the desired results without reliable hosting
