

Car vs Building Specialists

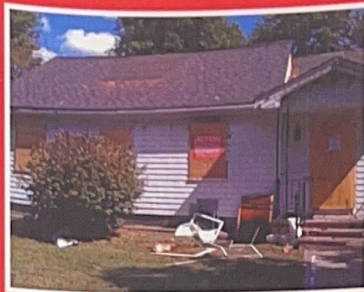

Action is your Car vs Building specialist. When a car strikes a building or home, many times the car itself becomes the only thing keeping the structure from collapsing. Our team of professionals are relied upon by numerous police and fire departments as the first call to stabilize the structure involved and remove the vehicle safely.

Structural Stabilization and Collapse Unit

Action Emergency Management is fully equipped to perform services and respond to any structural collapse, building stabilization, and shoring on any residential or commercial facility to handle temporary or permanent structural situations.

City and Town Abandoned Properties

Action has a successful track record of assisting Banks and Cities who foreclose on properties. These properties quite often need to be cleaned out or boarded up for the safety of the community or to retain their worth. Action gets the job done fast and efficiently working with Banks, Cities, and Code Enforcement Agents.

Cost of Services

Action Emergency Management will work closely with your insurance company to ensure no cost above your deductible comes out of pocket. If uninsured we will negotiate costs that are affordable to your situation.

If the city or state becomes responsible for the services that need to be rendered we will work with the city or State to negotiate a cost effective solution.

Action will provide free estimates on all your demolition or construction needs.
