The eyes are marvels that broadcast a wide range of information from someone's core level. We can see where things are stuck, what traumas are being processed, and often reveal information about life mission. They point communicating styles and limiting patterns that, when addressed wisely, can be turned into big blessings. Eye Talk (TM) is a sacred technique that requires

associated tools and a high level of integrity and consciousness; thus, this class has a few pre-requisites. If you'd like to deep dive into the language of the eye, you can vastly deepen the work that you do and even create an entire career out of it!
