Real customer hearing aid reviews

[Write a review](#)

★★★★★

"I went to the Denver location and saw Jordan who was so professional and courteous. He is detail-oriented and will go the extra mile to help."

Pat Litson

★★★★★

"I have worn hearing aids for over 15 years and used several products. I bought the Clara hearing aids 3 years ago and found they performed as well as the \$5-6,000. Sets did. I just bought the Bluetooth pair and am thrilled how easy they connected to my smartphone and how clear they play voice and music. The great thing is you don't have to wear a throb around your neck. Love them."

Chet Smith

★★★★★

"Price, and quality are top notch. I saved 1000's over the other options I was pitched and am glad I made the decision. It is normal to be wary or skeptical with a purchase like this online, but the company goes above and beyond to with their customer support and personalized adviser to ensure you get the best fit and experience possible. I can honestly say these aids will change my life in a very positive way without breaking the bank to do so."

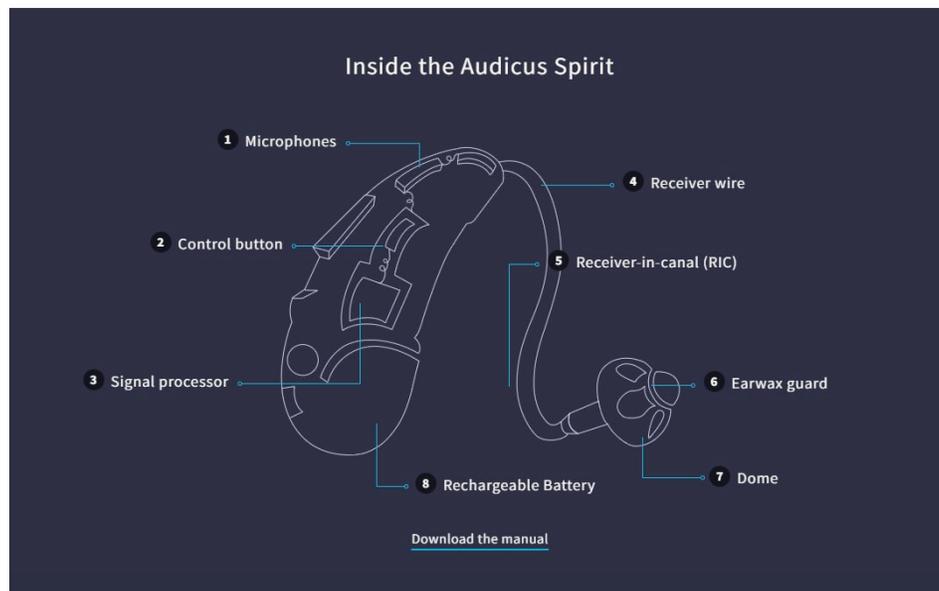

Kirkland R McIntyre

★★★★★

"Audicus online hearing test worked very well, all the people I talked with were very courteous and very knowledgeable. I received my hearing aids fast, put them on and they worked better than the 6000 dollar ones I had. Thanks to all at Audicus."

Burney W.

An Audiologist in your pocket

On-demand Audiologist adjustments sent directly to your phone. Custom hearing with the push of a button.

Control at your fingertips

Switch through programs like Conversation in Noise and TV/Music to fit your environment. Easily adjust between 10 volume settings.

Batteries that last as long as you do

High-density lithium batteries, provide high quality listening for days, with fast recharge.

Direct-streaming Bluetooth

Stream directly from your Apple or Android smartphone to make calls, watch TV, listen to music, and talk in the car. Control and customize your hearing experience easily through a dedicated app.

Good sealing reduces squealing

Hypoallergenic domes seal out excess sound. Comes in a variety of shapes and sizes for comfort and clarity.

Focuses on speech, cuts the clutter

Two directional microphones. The front focuses on the speech cone while the rear mic suppresses excess noise for clear conversations.

Hear the difference with digital signal processing

The brains of the operation. Performs millions of computations per millisecond delivering crisp, tailored sound with no feedback squealing.
