Description

Show Less

Colorful feather toys. In the process of swinging the tumbler, the feathers swing up and down, giving the cat a feeling of bird hunting. Colored feathers are richer in color than ordinary brown gray natural feathers and can attract cats more. The base is designed as a tumbler, which can stand 45 degrees or 60 degrees after falling. This will interact with the cat while playing. Cats like interactive toys, which can stimulate their hunting nature. SiJinHaibf always makes safety a priority, which is why we design products to meet child safety standards; they do not contain small parts, long cords, or other hazards, ensuring the safety of both pet and child.
