Overcome safety obstacles with Rosco **backup camera systems for commercial vehicles**. They're engineered for a higher standard of vehicle vision safety. We make cameras that work reliably for all types of passenger or cargo transportation. Our products offer real benefits, from improving [school bus fleet management](#) to boosting [garbage truck safety](#). Our backup systems with multiple camera inputs allow you to add side cameras for all-around blind spot reductions. Choose your preferred monitor size with features tailored to your fleet needs and operational conditions. We have the multi-camera configurations that allow for split second viewing transitions. Or you may want a commercial backup camera system with a built-in microphone. When live audio is heard through monitor speakers, drivers gain another safety resource. We'll help you set up a vehicle vision solution that accommodates from one to four cameras. Consider premium backup cameras for vehicles that face demanding conditions. Choose Rosco for a century of experience and made in America manufacturing.

Automotive Backup Camera Systems Deliver Clear Images

At Rosco, we believe shifting into reverse should never include guesswork or obstructed vision. With dependable **automotive backup camera systems**, reversing is performed with the right perspective. We build cameras that deliver clear, wide angle views that benefit drivers and employers. Our vehicle [backup camera systems](#) come with monitors that display super sharp images from first light into deep darkness. Camera night vision is generated by high output LEDs. Our weatherproof cameras also supply 100° plus angles behind the truck, van or bus. Shop for total systems or individual commercial vehicle backup cameras that offer expansion capabilities. Need assistance? We're ready to help!
