FUSING ENGINEERING & ART

Our Values

Quality Unparalleled

RIVA is built on the concept of servant leadership. We have found ourselves at the forefront of jewelry manufacturing by serving and supporting growth in both our customers and our employees. Our commitment to detail and excellence is founded on this concept and guided by our mission: to honor God through our service, process and product excellence.

Our Capabilities

Inventive Problem Solvers

Our client relationships constantly shape us into who we are. Over the years, we have grown according to our partner's needs. Constant adaptation to the latest technology, investing in inventive problem solving and excellent customer service are what makes both sides of a partnership thrive.

Our Collections

White Label Solutions

Apart from working with our customers and partners to bring their ideas to life, we also design and develop our own collections of classic and time-tested pieces/styles that jewelers can pick from to expand and/or replenish their inventories. By making these White Label collections accessible to our clients, they, in turn, can satisfy their customers' needs all year round. Development for each piece in these collections are guided by RIVA's design principles which put ethical sourcing, sustainability and social responsibility first.

Our Home

Brooklyn Made

With The World's Finest Materials

Our service has always depended on the availability of talented craftsmen that New York City has to offer. Although many manufacturing plants have moved overseas, we have planted our feet firmly at home. Manufacturing during the fashion world gives our clients the chance to visit our factory, touch their product, and see firsthand the artistry behind the art.
