FRONT-END

Supercharge patient access

## Optimized front-end revenue cycle driving faster collections and fewer denials.

AI-powered automations enable an error-free front office that supercharges registration, verification, and prior authorization. Lay the groundwork for successful claims - maximizing revenue and eliminating your staff's manual work, and re-work.

### Care Review

Automated CPT code review, completion, and auditing.

BACK-END

Eliminate revenue leakage

## Boost collection speed and accuracy by automating billing, reducing denials, and ensuring clean claims.

Leverage the power of automation to generate, clean, and submits claims, freeing staff to focus on higher-value tasks. Use the power of intelligent automation to identify and handle denied claims and patient responsibility invoices, automating the payment posting process to eliminate errors and reduce workload. Benefit from auto reconciliation across various banks, bringing reconciliation into daily practice and allowing for faster course correction.
