FF&E LOGISTICS MANAGEMENT

Our comprehensive logistics management program includes installing your FF&E and OS&E product direct from the vendor. Through our specialized CHS purchase order tracking and inventory management system, your team has 24/7 access to the inventory and tracking data they need to make accurate scheduling and construction-related decisions. With Leap, you will have a single point of contact and a centralized process to ensure easy communication, safe pick up and delivery and complete transparency at every point along the supply chain. Our goal is to get your fully furnished and equipped facility up and running as soon as possible, producing revenue quickly and securely.

Businesses need high-value products that require special handling, set-up and delivery. At Leap, we specialize in helping shipments like this get where they need to go – on target and on time, every time.

Leap provides custom transportation and warehouse service solutions to clients around the globe. Through our Leap Fleet and an extensive network of warehouses, we offer a full range of services, including:

- Delivery and placement
- Uncrating and debris removal
- Assembly and installation
- On-day, on-time pickup or delivery
- Brokerage
- Logistics management

DEDICATED LOGISTICS MANAGEMENT

Leap offers a network of national and international carriers and a full range of transportation and logistics forwarding services for projects of all scopes and sizes. With features like:

- Direct vendor and consignee communication/coordination
- Delivery notifications sent to all PMs
- Automated purchase order download – we integrate with your system to extract relevant purchase order information.
- Automated nightly updates and shipping progress
