Hang on.

"Small scale."

The Raabiko Digital Luggage Scale is a basic luggage scale with a bright backlit display. Turn it on and hook your luggage to the strap. The fit and finish is on the cheap side. I can press one side of the display panel (the side with the button) all the way in. It doesn't look like my sample have any support under it. The included instructions are also basic. Pretty much what I wrote in the second sentence. After some messing around, I finally managed to change the default unit on the scale. You have to do it while the scale is going through its start up cycle by pressing the only button on the scale.

Handy little luggage scale, though in this style I prefer the smaller models.

[Vine Customer Review of Free Product](#) (What's this?)

Very easy to use.

Convenient size and shape, however there are others that are a little smaller with the same functionality. They take up less space when packed.

There are also ones that can be hung up, which makes for easier, more accurate weighing when there's an available spot to hang from.

Minor gripes:

It uses a button battery (CR2032).

I wish it used AAAs and/or USB-C recharging, because I'm likely to have an eneloop rechargeable AAA on hand, and sure to have a USB-C power charger, but I'm not going to carry a spare button battery just for this while traveling.

(And I try to avoid non-rechargeable, disposable batteries).

And I'll likely need a spare battery because there's no way to keep it turned off while packed, short of removing (and potentially misplacing) the battery. The power button is just too easy to press accidentally.

Quick weight check

This device helps to keep me out of trouble. We travel often and when we are going on a plane or a cruise, my husband is always sure my suitcase has gone over the allotted weight limit. This small, portable luggage scale lets me know how much more I can stuff into my suitcase. The fact that it is portable is great. At home, you can probably use a bathroom scale and get the same results. Away from home, as you add souvenirs and other new items, this scale can keep you from spending extra bucks for overweight luggage. There have been times when we have had to redistribute items in our suitcases to even out the weight. I cannot vouch for 100% accuracy as you are holding the scale with the suitcase dangling, but it is close enough for our purposes.

Easy to read. Portable. But accuracy could be improved

This is a good travel scale. It has multiple different units to choose from. The way to select the unit is not very intuitive (you have to select the unit during the first 1 or 2 seconds when it powers on) but once you figure out, it's easy to do.

Unit is small and can handle up to 110lbs.

The only thing to improve is that the accuracy which is off by about 100g. In most use case it is ok. Even your suitcase exceed by 100g during check-in it should be easy enough to remove 100g worth of items from the suitcase. Just something to keep in mind.

Other than that, this is an excellent tool to bring with you.

I have a number of portable luggage scales, and I like the t handle style. This one is off center, apparently designed for you to split your fingers one and three rather than 2 and 2.

The scale has a hold function, after the way to stabilized it will record the weight of an object and keep that measurement so that you can set your luggage down and see what the weight was. The missing feature is a beeper. It can be inconvenient to stare at the reading waiting for it to say hold, which it does with tiny text. It really could use a beeper.

That being said, the screen is nicely backlit. And you even have the option of reading out in grams as well as kilograms in pounds. However I wouldn't put too much stock in the grams reading at low weights. This is a 50 kg scale, not a gram scale.

Great Product

You cant beat this product, especially for the price! When I wanted to weigh something, I would have to go out to the garage and get my electronic fish scale out of my tool box, put a battery in it and then weigh the item. Then I would have to remove the battery (to prevent a leaking battery from destroying it) and put the scale back into my tool box. Now with this scale, because it is so compact and modern, and because it has a coin battery (CR2023 which I have never had one leak on me - only just go dead), I can keep this in a sock drawer and never bother with it until I need to weigh a bag. It fits in your hand very naturally, and comfortably. I really like the design of the strap and clip which makes this very easy to put on and take off. I can easily read the scale while still holding the scale and bag, and it will hold the reading once it settles, and you remove the scale from the bag. Very nice product!

Accurate, portable, great for travel

Reviewed in the United States us on June 22, 2023

I always keep a couple of these luggage scales around and throw them in the luggage if I go by air. The airlines are quite stringent with their requirements for luggage now so it's always nice to have a small but accurate scale for the journey back. The Raabiko luggage scale is similar in style to other luggage scales. It uses a strap that loops around your luggage handle, and hooks back on itself. You power it on and lift it up, with the luggage off the ground, and try to keep it as steady as possible for it to get a good stable reading. It's accurate enough as it is when used on dumbbells, but when you're lifting something with shaky hands it can fudge the readings a little if you're cutting it close to the limit. I suggest you do this a few times to get a good average value. It's still quite accurate as a scale so generally the readings should all be very close, like a fraction of a pound different at most.

I am not sure what more to say about this except that it works great and is easily portable. The weight seems accurate and it is very easy to read and use. We recommend it.
