ABOUT US

Bring fun to your way!

we believe that technology makes communication easier and easier, but it becomes more difficult to connect the people, places, and experiences that are most important to us. iSinwheel brings all the things you want closer to you, enriching your life in an easier, cheaper and more interesting way. Your office, the new ramen shop, the friends you are eager to bring to the new ramen shop.

Our Story

Isinwheel was established in 2018. It's specialised in electric scooters for personal transportation and is owned and operated by DOUBLE KING INDUSTRY (HK) CO., LIMITED. Shenzhen Xincheng Innovation Investment Partnership (Limited Partnership) is responsible for supplier coordination.

At Isinwheel, we're passionate about making riding fun through our daily efforts, be it at the park, on a busy street, or on the beach. Not only do we desire to provide a highly effective commute, but also a more enjoyable riding experience. Isinwheel provides convenient, eco-friendly, stylish, and affordable ways of transportation. With the different models of Isinwheel, you can find the e-scooters or e-bikes that fit you most whether you are a student, photographer, programmer, officer, enterprise employee, athlete, outdoor enthusiast, etc. No more hassle, just ease and fun.

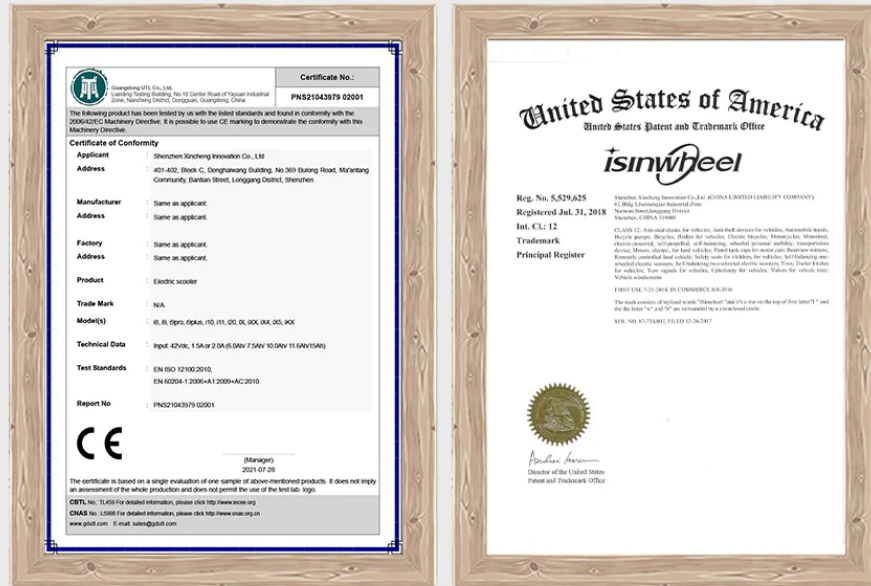

Our Mission

Safety is our primary requirement. We take the safety of every customer seriously. If the product has potential safety hazards, then we will not sell it. iSinwheel only allow the sale of electric scooters that have been tested and approved by a professional technical team. We have our own factory to ensure that you get the best quality products at the most favorable price possible. Since many electric scooters are not suitable for the weather at all, we have created our own waterproof, durable and high-quality electric scooters. We have tried subways and buses, electric bicycles and shared bicycles, and even taxis. We sat on the crowded subway or bus and missed important meetings. We were riding e-bikes or shared bicycles, sweating profusely, clothes were messy. We spent a lot of money to take a taxi but got stuck on the city roads during the rush hour. The scooter saves all time and all fresh air, and plays an important role in the daily life of office workers. Its full power gives us a sense of security. It is light and easy to fold and store.

The products are of high quality and high safety

There will definitely be multiple certification materials. These certificates are not only a brand effect, but also make customers more trustworthy.

Why Choose Isinwheel?

We're experts - we aim to offer you the high quality range of e-scooters on the market, whilst providing you with excellent information and insightful views on those products.

Price match promise—we offer you the Preferential prices - as a Manufacture we get great discounts, which we can pass onto you in the form of lower prices.

We deliver outstanding service - our dedicated UK/EU/USA-based customer service team are here to help you choose the right e-scooter for you.

We operate integrity. We supply manufacturer-backed warranties - our warranties are supplied by us, in the UK/EU/USA, and are 100% backed by manufacturers.

We're campaigners for pro-legislative change - we're fighting for electric scooters to be made legal on roads, while also pushing for improved cycle path networks throughout the UK/EU/USA. We're passionate about access and infrastructure for all personal electric transport users.

We're environmentally conscious - as a company we endeavour to be as environmentally responsible and sustainable as we can be.
