Item description from the seller

16 Ports Connect with All Devices

The PoE Ethernet switch provides 16 10/100/1000 Mbps RJ45 ports that can automatically identify and power PoE devices, connecting all your devices together. Up to 25W power is supported for each PoE port, which allows for stable transmission.

Stable & Efficient Data Transmission

The PoE switch supports 25W power for single ethernet port, IEEE802.3 af/at network standards, and 25W output power. Which allows for stable and efficient data transmissions between your PoE cameras and recorders.

Plug and play, Faster and Easier

No software required, just manually change the IP address to connect the camera on the switch to your NVR or DVR, and then plug in the power cord and ethernet cable and all is done.

Multiple Installation Options

Built-in power supply makes adapter no more needed, easier to use. The switch supports desktop, wall or rack placement. You can also put the devices into switch racks according to your needs.

Metal Casing & Less Noise

Sturdy metal casing and powerful industrial-grade fans provide better heat dissipation while effectively reducing noise, enabling longer-lasting operation in a variety of temperature environments, making the switch run more stable.

Seller feedback (9,583)

r***l (1570) • Past month

I will have to return this equipment and above all, please stop selling it, it has several defects: 1. The application that marks the device "Sannce Smart", is not available in the Play Store, it is necessary to download it externally 2. The application does not allow me to register as a user 3. Due to the above, it is impossible to view the cameras remotely with any Wifi device
