Chloride

Essential Mineral Concentrate.

Magnesium, potassium, sodium & calcium chlorides, found abundantly in the human body, are involved in hundreds of essential biochemical reactions that keep the body functioning properly. They are some of the body's most essential minerals and play a role in protein synthesis, cardiovascular health, immune function & blood sugar management.

Enzymes

Multiple Proteolytic Enzyme Concentrate.

The circulatory system permits blood to circulate and transport nutrients (such as amino acids and electrolytes), oxygen, carbon dioxide, hormones, and blood cells in the body to provide nourishment, stabilize temperature and pH, and maintain homeostasis. Enzymes are concentrated from a complex, richly nourishing blend of fermented vegetable extracts, formulated to complement circulation and blood flow without affecting body physiology directly. Suited to evenly balance skin tone and quality. Also appropriate for cardiovascular activity. Go with your flow.

PH Caps - 105 Capsules

PH 10.3 Deep Ocean Alkaline Salt Capsules.

Compared to natural Sea Salt, PH Capsules are lower in the chloride Sodium and higher in the chlorides of Potassium, Calcium and Magnesium. Alkaline, mineralised Sea Salt can have a profound effect on hydration, circulation and the appropriate regulation of gut PH, all fundamental for digestion and a balanced, harmonious microbiota. Being high dosage, vegan-friendly vegetable capsules, they are rapidly absorbed.

PH Caps - Fantastic!

I noticed a significant difference when taking the PH Caps. No stomach bolting or discomfort after meals. I highly recommend adding PH Caps to your program for a full spectrum benefit.

[Support](#)

[Home](#) / [Gut Care](#) / [Prebiotic](#)

Prebiotic

Prebiotic Stimulating Syrup.

Imagine a sugar that promotes mineral absorption of calcium and magnesium, improves the production of enzymes and improves your digestion. These oligosaccharides (concentrated non-digestible sugars) aid in the growth and activity of beneficial bacteria within the gut. And because the oligosaccharides in Prebiotic can only be digested by good bacteria and not your stomach, they won't raise blood sugar levels.
