

OTT SOLUTION

Advanced technology for the distribution of multimedia content

Over the top (OTT) is a type of media distribution that allows to offer audio, video and other multimedia services directly to the user through the internet.

OTTs are expanding at an accelerated pace, and in Toolbox we have a special solution for the development of these platforms.

By fusing together the best qualities of our user validation, distribution, acquisition, content management and apps products we launched an evolved solution: OTT Solution.

OTT Solution promises visualization experiences with the highest quality from all devices.

Connect users directly with their favorite content whenever they want to.

Using our technologies, you will increase your company's participation in the OTT market.
