Back To School Despite His Disability

According to UNESCO's 2010 report on education, "disability is one of the least visible but most potent factors in educational marginalization." Yet, despite his disability, Alam was able to return to school.

 **ReSurge International at a Glance**

ReSurge International (formerly Interplast) provides free reconstructive surgeries for the poor and builds year-round medical access in underserved areas. It restores the dreams of those with deformities and injuries, and impacts the world by renewing the health of thousands of children and adults each year so they can go to school, provide for their families and contribute to society.

Volunteers: Giving Time to Transform Lives

Incredible volunteers make our work possible. These individuals give up two weeks of their lives, travel around the world, work under exhausting circumstances and give up pay, vacation time and comfort to help transform lives. Our medical volunteers don't just hail from ... [> more](#)

Making Dreams Possible

Tonmoy, a 13-year-old boy from Bangladesh, was living the life of a normal little boy: climbing trees and running around. One day, while running through the house, he bumped into the stove and knocked over a pot full of boiling water that severely burned his skin. ... [> more](#)

Andrea: From Patient to Nurse

Andrea was born in Loja, Ecuador with a bilateral cleft lip and palate. Back in 1985, the prospect of getting help seemed almost impossible. UNICEF described Ecuador as "one of the most inequitable countries in the world", and the nation's poor had little access to ... [> more](#)
