

THE WORLD'S HIGHEST-RATED DATA CENTER CAMPUS ECOSYSTEMS

TIER 5[®] PLATINUM COLOCATION

Switch's Tier 5[®] Platinum hyperscale data centers go beyond Tier IV Gold ratings and have become the new standard in design, construction and operations in the data center industry. These massive purpose-built colocation facilities provide clients access to the power of a diverse technology collaboration ecosystem and a dedicated team driven to help clients connect, innovate and develop technologies of the future, **enabling our hyperscale data center ecosystems at unparalleled low pricing.**

100% GREEN POWER

All Switch data centers are powered by 100% renewable energy and are supported by patented tri-redundant power systems that can support up to 55 kilowatts of power (per cabinet) at scale. Switch's access to local renewable energy sources allows the Switch PRIMES[®] to meet the hyperscale power needs of each campus location, and at highly competitive pricing.

LOW OR NO TAXES

Switch is located close to the major enterprise business markets, yet strategically outside expensive tax and high-cost of living areas. Switch collaborates with local governments in each primary latency zone to create tax advantages for our clients, which translates to huge savings.
