

GUARDIAN ANGEL safety device– Lighting the Way to Increased Safety

1. Purpose

A total of 1,799 law enforcement officers died in the line of duty during the past 10 years – this is one death every 53 hours. 163 officers were killed in 2011 alone.

The **GUARDIAN ANGEL** safety device will reduce these numbers.

Officers can increase their visibility with the touch of a button, helping to avoid traffic fatalities and providing a visual cue of distress in the field. Officers can quickly locate their partner in case of separation, ensuring no man is left behind.

The **GUARDIAN ANGEL** safety device is the only product of its kind, saving lives through simple, unobtrusive design.

2. Product Features

Using innovative LED technology and a streamlined design, the **GUARDIAN ANGEL** safety device sends out a beacon and colored lights that are visible from the top, sides, front and rear of the unit in both daylight and night conditions.

With a single button, you can easily adjust visibility on the fly. Rear lights can be illuminated for low suspicion. Both the rear and front lights can be lit as a situation intensifies, and if help is needed, all three lights can illuminate.

The **GUARDIAN ANGEL** safety device is:

- Tough – handles any weather, from dry desert heat to a raging blizzard
- Rugged – water resistant and unaffected by humidity and fog
- Portable – once mounted on the shoulder or belt, the officer won't know it's there
- Lightweight – about the size and weight of a smartphone!
- ALWAYS WITH YOU – without a second thought

The **GUARDIAN ANGEL** safety device also acts as a 21st century dog tag, providing information that can save an officer's life while protecting personal data. Officers can enter their vitals (such as age, blood type, medication, allergies and emergency contact) on the **GUARDIAN ANGEL** website to create an indestructible card or computer chip that clips into the mount for medical crew access.

3. Benefits

The **GUARDIAN ANGEL** safety device increases an officer's safety as they conduct their everyday duties.

- Officers are highly visible during nighttime traffic stops, preventing injury and death.
- Citizens can quickly and easily recognize the presence of law enforcement.
- Officers can document that they were wearing an activated **GUARDIAN ANGEL** safety device to signify law enforcement presence.
- A **GUARDIAN ANGEL** safety device differentiates law enforcement from private security officers with deceptively similar uniforms.

The **GUARDIAN ANGEL** safety device is a cost-effective component of an officer's uniform. Designed for longevity, the unit can be easily recharged and the LEDs have an extended life so replacement is infrequent. This single item reduces the amount of personal equipment an officer must purchase to be properly outfitted.

The proven technology of the **GUARDIAN ANGEL** safety device is extremely reliable and offers another option to communicate location if the radio system fails. You will be able to see the officer before you hear cries for help.

4. Technical Specs

The **GUARDIAN ANGEL** safety device can be mounted in multiple locations, including, for example:

- Shirt – epaulet mount
- Plain clothes – using a magnet
- Vehicle – suction cup mount
- Alternative vehicle mount – rubberized clip for handle bars
- Duty belt – clip mount
- Alternative metal surface mount – mounts to anything metal or magnetized

The interchangeable LED lights on the **GUARDIAN ANGEL** safety device emit 700 lumens, offering visibility from distance.

The **GUARDIAN ANGEL** safety device's standard battery offers 4 hours of continuous use, and can be recharged through an AC adapter or USB port, similar to a smartphone.
