FastIRFET™ Power Blocks

IR's FastIRFET™ family offers benchmark performance with best-in-class R<sup>2</sup>Q figure of merit. The family features optimized packaging tailored to application requirements for size reduction. Ideal for high frequency applications requiring low switching loss or high light load efficiency. Excellent choices for DC-DC and POL cutting edge applications, such as base station power amplifiers, high performance DC-DC bricks, Platinum+ power supplies and high end battery driven motors.
