What would it take to get every claim routed and prioritized for the optimal outcome?

An IQ of 300. (Or Ensemble's collections workflow A.I., EIQ.)

In revenue cycle, an abundance of data doesn't guarantee meaningful insight and results. But with the help of artificial intelligence and workflow automation, Ensemble IQ software transforms your collection results by constantly prioritizing accounts, accelerating appeals and cleaning up accounts receivable. Using our predictive models, our EIQ SaaS delivers more cash faster – saving you resources and adding to your bottom line.

✓ 60% Workflow Productivity Boost

✓ 15% Cash Collection Improvement

✓ 38% Post-Denial Payment Increase

Rather than alpha splits, or balance ranking, Ensemble IQ's algorithms determine which accounts will yield the most value from your staff's time and prioritizes worklists accordingly.

Typical

Rank order accounts based on account balance

AR clean-up done in Excel and outside workflow

Payor account status information obtained manually

Denials and appeals managed outside workflow and in spreadsheets

Simple rules engines govern follow-up

EIQ Software

Rank order accounts based on expected value

AR clean-up done in workflow

Payor account status information obtained automatically and integrated in workflow

Denials and appeals management in workflow

Sophisticated rules engine optimizes follow-up and integrates predictive models
