Coronavirus Variants Have Changed The Fight Against The COVID-19 Pandemic
Earlier this year, there was a strong hope that high levels of vaccination would see us all finally getting the upper hand over SARS-CoV-2, the virus that causes COVID-19.

We DO NOT have Graphene in Any of Our Masks
You may already be aware that Health Canada has issued a recall on disposable masks containing a material made of tiny particles called graphene. The agency is advising people not to wear masks with graphene or biomass graphene.
