Product Description

From the Manufacturer

With the K950 Active, we have combined 40 years of experience with the latest advances, whilst always focusing on user ergonomics, safety and reliability. The result is a completely new power cutter with a slimmer, more manageable body and a highly efficient 94 cc engine with the raw power required for 16" blades.

Convenience and safety increase efficiency

Working with a Partner machine is more efficient and safer thanks to the ergonomic, balanced design with a sleek

Husqvarna K 750

The Husqvarna K 750 belongs to the new generation of power cutters – developed from the ground up, inside and out. Our unique engine technology, DualCharge™, brings you a highly powerful 3.7 kW engine with low emissions and good fuel economy. It's simply a cleaner, more efficient engine. The K 750 is also equipped with a large, effective muffler and a vibration dampening system that makes the machine extra quiet and easy to use. As usual, all technical solutions are implemented with a clear focus on what is best for the user. And to ensure efficient cutting, without compromise.

DualCharge

The engine, with DualCharge™, provides more power, lower fuel consumption and greatly reduced emissions.

Active Air Filtration™

The Active Air Filtration™ has been upgraded with a redesigned paper filter, for even better dust control.

SmartCarb™

Built-in automatic filter compensation, maintains high power and lowers fuel consumption.

DuraStarter™

Patented, dust-sealed starter unit, where the return spring and the pulley bearing are sealed. This makes the starter virtually maintenance free, giving a further boost to the reliability of our cutters.

ADDITIONAL FEATURES

- EasyStart ensures 50% easier starting by reducing the compression in the cylinder during starting.
- All our cutters except the K 3000 Electric feature our robust new wet cutting kit, with low water usage.
- The cutting arm is reversible which lets you cut closer to walls or the ground. The drive belt has a fully sealed trans-mission. This keeps out cutting dust etc, reducing wear.
- Sealed transmission reduces the wear and slippage risk.
- Fuel indicator on the tank shows fuel level, to help avoid unnecessary stoppages.
- Easy-adjust blade guard
- Replaceable arbor bushing
- Several models are equipped with a Poly-V belt, for

better transmission of power, far longer product life and extended service intervals.

- Our anti-vibration system reduces vibrations in the cutter handles, so they are more comfortable to hold and can be used for longer periods. To enable the user a comfortable operating position and to reduce strain, the distance between the handles is large. The handles and the short engine body mean the user always stands close to the machine, for easier handling and control.
- 25% less noise thanks to a larger muffler.
- Integrated holder for T-wrench isolated near the water connection.
