Local Scene

It's no wonder SoHo is known as one of the style capitals of the world. With hundreds of unique boutiques you are certain to find that one of a kind item. SoHo is home to many of the best designers in the world who sell their work out of charming boutiques.

Fun Facts

The neighborhood rose to fame as a neighborhood for artists during the 1960s and 1970s, when the cheap spaces vacated by departing factories were converted by artists into lofts and studios. SoHo's lofts were especially appealing to artists because they could use the wide spaces and tall ceilings that factories and warehouses required to create and store their work.
