## Test Strips & Control Solution

**Advocate Quick Draw strips make the test easy and accurate**

- Easy to handle
- Flip-Top bottle design: Opens, closes and handles easily.
- Patented bottle design with built-in desiccant: Keeps strips fresh after opening.
- Capillary Action Technology and Visual Confirmation: You can see how quick a Advocate strip automatically draws the right amount of blood for an accurate reading.

### Control Solution

Control Solution is used to prove the accuracy of the Advocate meter and test strips. Control solution has three functions:

1. To practice doing a test without using blood.
2. To ensure that your meter and tests strips are working together properly.
3. To verify that you are doing the testing procedure properly.
