Products

Installation panels

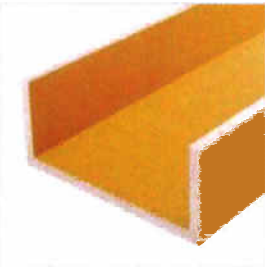

Schluter-KERDI-BOARD is a multifunctional tile substrate and building panel, which can also be used for creating bonded waterproofing assemblies with tile coverings.

[Schluter-KERDI-BOARD](#)

Grooved installation panels for curved elements

The grooved version of the Schluter-KERDI-BOARD panel is designed for creating rounded and curved elements.

Installation panels for L-shaped and U-shaped elements

The innovative, prefabricated L-shaped and U-shaped panels of the Schluter-KERDI-BOARD system make it especially easy to conceal pipes and columns.

## Waterproofing, Uncoupling, and Drainage Membranes

**Schlüter®-DITRA-XL**

Schlüter-DITRA-XL is the latest innovation in uncoupling membranes. DITRA-XL provides the same four essential functions as Schlüter-DITRA (uncoupling, waterproofing, vapor management, and support/load distribution), but is 5/16" (7 mm) thick, allowing for even transitions between ceramic tile and 3/4" (19 mm) -thick hardwood flooring and ceramic tile application on single-layer wood subfloors on joists spaced at 24" (610 mm) o.c.

▼ ▲ ▼ [Read more](#)

**Schlüter®-DITRA**

Schlüter-DITRA is a polyethylene mat with square, dovetailed recesses and an anchoring fleece laminated to the underside. In conjunction with tiled coverings, Schlüter-DITRA forms an uncoupling, waterproofing, and vapor pressure equalization layer.

▼ ▲ ▼ [Read more](#)

**Schlüter®-KERDI**

Schlüter-KERDI is a polyethylene, waterproofing mat equipped on both sides with an anchoring fleece. It is suitable for waterproofing in conjunction with tiled surfaces on walls and floors.

▼ ▲ ▼ [Read more](#)

**Schlüter®-TROBA**

Schlüter-TROBA is a cleavage and drainage layer for use above a horizontal waterproofing layer and below a screed or gravel layer. It consists of a pressure-stable polyethylene sheet with perforated studs for reliable drainage. Tile applications above screeds require the installation of Schlüter-DITRA as an uncoupling and waterproofing membrane.

▼ ▲ ▼ [Read more](#)

**Schlüter®-TROBA-PLUS**

Schlüter-TROBA-PLUS is a durable and reliable sub-surface drainage system that prevents the possibility of capillary action. The closely positioned, cone-shaped studs can withstand heavy loads and are covered by a water permeable, fleece webbing. The studded mat raises the entire surface assembly, creating a continuous drainage area.
