

Welcome to the Health Professionals Portal

Welcome to VREE Health Connect - a unique online practice management system that allows you to connect with and monitor your patients through a secure suite of decision support tools. To begin, start by performing one of the tasks below.

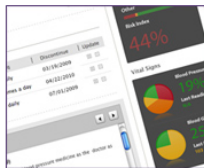

Teresa Lopez

Date enrolled: 03/31/2011

Health Care Professional Type: Institutional Enterprise
Health Care Professional

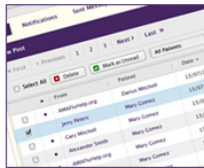

Active patients: 1

Review Patient Charts

Get detailed views of patient data using VREE Health Connect Patient Charts. Accessing a Patient Chart allows you to do a more in-depth review of patient status, medications, vitals, basic information, enrolled Services, and Health Session responses. Also use the Patient Chart to create and manage patient Notes.

Continue

Secure Messaging

Connect and interact with patients using the VREE Health Connect secure Message Center. The VREE Health Connect forum-like messaging service makes it easy for you to stay in touch with your patients, and notifies you of any concerning health issues they may be experiencing.

Connected Care

VREE Health Connect gives you the tools you need to meet the goals of meaningful use.

The VREE Health Connect Connected Health Platform is an integrated suite of online Professional and Consumer Portals that seamlessly connect health care professionals, patients, families, and caregivers.

The VREE Health Connect Professional Portal includes best-in-class care management and care coordination tools designed to help you deliver better patient care and expand access to your services while optimizing practice efficiency. This portal speeds the exchange of relevant health information across the continuum of care as it enables shared decision-making and offers new revenue-generating opportunities.

Electronic Medical Records: Access and Manage Patient Information

VREE Health Connect Professional Portal provides an interoperable, secure system comprised of an electronic medical record for health care professionals that is connected to a personal health record for patients, families and caregivers.
