## Control the bid process to win more work

Venture Project Collaboration Software opens a window into the bid process by allowing you to monitor the activity of each subcontractor and supplier. Venture captures email opens, replies, document views, file downloads, and bid responses, enabling you to monitor all activity. This provides valuable new insight so you can actively influence participation by bid partners.

- Create detailed bid packages and apply scopes of work
- Generate customized reports on each bid package to track their progress
- Import and manage your contact list
- Invite subcontractors to bid on your project and create bid package schedules
- Use real-time tracking of responses and document activities to ensure the best possible bid coverage.
- Prequalify subcontractors
- Upload plans, specifications and other documents
- Notify invitees/team members of document changes and new versions

### Subcontractor benefits

Venture is free for subcontractors, so more subcontractors will bid on your project. And Venture provides free entry level versions of eTakeoff and On Center to simplify their bid process and improve accuracy. Venture's integration with these powerful takeoff tools will synchronize project folders, document changes, and new versions.

These capabilities mean that you'll involve more contractors in the bid process, you'll select the best team members, and they will have instant access to the latest plans and specs. You'll save time every step of the way enabling your pre-construction team to do more analysis and develop the winning bid more often.
