Credit Card Integrator - Venture's integrated credit card processing solution not only speeds the AR process, but also saves you money by eliminating rental and maintenance fees associated with stand-alone terminals and swipers. The solution eliminates the need for multiple business-rate phone lines for stand-alone solutions, and reduces expensive credit card fees by allowing you to qualify for bankcard programs that decrease transaction rates.

Of course, all of these features are fully supported with Venture e-commerce which means your traditional day to day transactions, recurring cycle billing and direct to consumer/retail transactions all flow through the same system.

Credit Card Integrator -

- Credit Card & eCheck components
- High volume processing
- No external dependencies

Capabilities:

- Enables you to accept customer payment via credit cards
- Integrates seamlessly with Venture solutions
- Strong database table encryption and key lock

Benefits:

- Eliminates rental of stand-alone terminals, credit card swipers, and associated printers
- Eliminates merchants' multiple business-rate phone lines for stand-alone solutions
- Improves accuracy and reliability through electronic authorization
- Saves time and improves customer service
- Eliminates expensive hardware requirements and re-keying errors
