CEMETERY PRODUCT DIVISION

---

ESTABLISHED IN 1892, FRIGID FLUID CO. IS A FAMILY-OWNED AND OPERATED COMPANY based in the western suburbs of Chicago. From its humble beginning in the founder's garage, Frigid Fluid quickly built a reputation of innovation and quality in the death care industry. Now in its 5th generation of ownership by the same family, Frigid maintains its fine reputation by focusing on innovation, maintaining quality manufacturing standards and fostering a customer-centric corporate culture.

## IMPERIAL™ & IMPERIAL 2.0™ CASKET LOWERING DEVICE

### OUR FLAGSHIP PRODUCT

Frigid revolutionized the death care industry when it introduced the casket lowering device to the market in 1918.

The original Frigid lowering device was the first fully-automatic lowering device, and its design, virtually unchanged today, was both easy to use and pleasing to the eye. Frigid introduced the Master™ model in 1949 and followed with the Imperial™ model in 1955. Both the Imperial™ and the Master™ share the same dependability, beautiful design, and affordability.

Frigid Casket Lowering Devices give you incomparable beauty, strength, and sturdy construction. The corner heads contain sealed, self-lubricating steel ball-bearings throughout, and high quality customized precision gearing made of tempered steel and bronze. At the heart of each unit is the one and only Frigid-designed and handcrafted governor and governor brake assembly, which works to maintain a smooth lowering speed. Streamlined design, inherent quality and master workmanship are priceless ingredients you'll find only in a Frigid device.

### All Frigid Lowering Devices are Available in Two Models

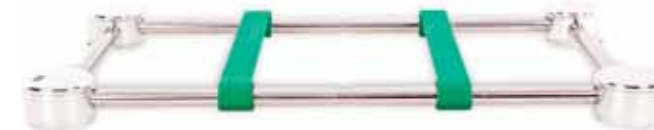

#### The Funeral Director Model

The long rails are designed to break apart and fold in half making it easier for 1 person to transport the device halves from gravesite to gravesite. The Funeral Director model also provides space savings when storage is necessary.

#### The Cemetery Model

On the Cemetery model the long rails telescope lengthwise but they do not fold or collapse. The rails are removable by the simple means of 4 threaded studs, but the intention of the design is that they stay attached at all times. For this reason a 2-man setup is recommended.

### IMPERIAL 2.0 A NEW GENERATION OF QUALITY

With a total weight of just 84 pounds and a seamless design in the head covers, the Imperial 2.0™ continues the same strength and reliability of the original Imperial™ model in a sleeker and lighter form.

Streamlined design, inherent quality and master workmanship, priceless ingredients you find only in a Frigid device.

The Frigid Imperial™ casket lowering device has become a favorite among customers because of its quality of construction and its assurance of performance. As a medium grade device, the Imperial™ is capable of bearing loads up to 800 pounds. The Imperial™ features an adjustable braking system giving you added control over the lowering speed. Weighing 110 pounds plain in the original model and 84 pounds in the 2.0 model, the Imperial™ is designed for either a one- or two-person setup.

The Imperial™ is available in two models: the Cemetery model or the Funeral Director model, and can be purchased with polished stainless steel tubing. The device telescopes from 62" x 26" to 94" x 38".

All Frigid-manufactured casket lowering devices include the following features:

- Sealed, self-lubricating steel ball bearings
- Custom-tempered steel and bronze precision gearing
- Frigid-designed and hand-made governor for smooth lowering
- Adjustable braking system for an infinite number of lowering speeds
- Chrome-finished hand brake for simple-release lowering
- Sturdy, polished aluminum cast heads house all moving parts
- High quality ISO:9001 certified stainless steel rails

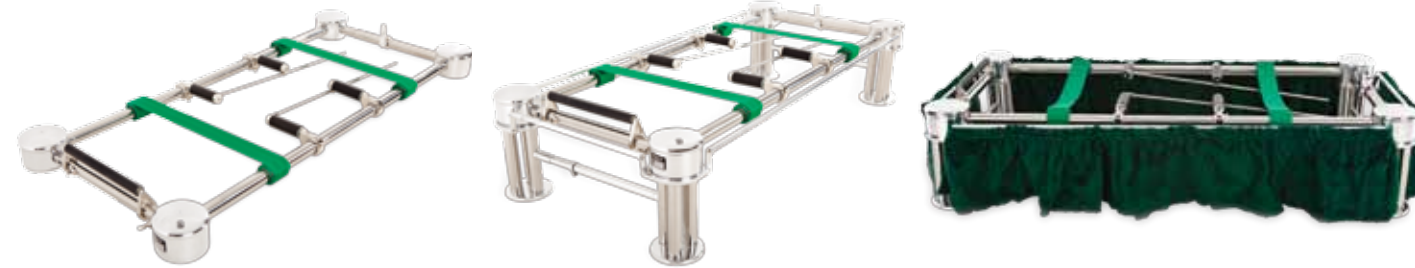

## MASTER™ CASKET LOWERING DEVICE

## FRIGID LOWERING DEVICE ACCESSORIES

### A LOWERING DEVICE FOR EVERYDAY USE

The Frigid Master™ casket lowering device's internal components are twice the size of the Imperial™ device, making it virtually maintenance free and great for everyday, heavy-duty use.

The Frigid Master™ casket lowering device is a high-grade lowering device specifically designed for everyday heavy-duty use. The load bearing components of the Master™ are twice the size of those found in the Imperial™ device, making it virtually maintenance free. With a 1000 pound weight capacity, it is an ideal choice for lowering a casket and fiberglass vault combo (use of steel and concrete vaults is not recommended with any casket lowering device). Weighing 130 pounds plain, the Master™ is the most durable lowering device on the market and is designed for a two-person setup.

The Master™ is available in two models: the Cemetery model or the Funeral Director model, and can be purchased with polished stainless steel tubing. The device telescopes from 62" x 26" to 94" x 38".

Also available is the Master™ over-sized device. The over-sized device is 6" wider than a regular lowering device to accommodate wider caskets. Device telescopes from 62" x 32" to 94" x 44"

### Frigid Lowering Device Stand

The original lowering device stand provides a sturdy base for the display of your casket lowering device during service. It stands 14" high and is made with stainless steel corner post tubing. All other tubing is polished aluminum. Weight: 50 lbs.

### Frigid Telescoping Lowering Device Stand

Constructed of the same materials as the original lowering device stand, the telescoping model is fully adjustable for hillside setup. One end of the telescoping stand adjusts from 10" to 18" while the other end adjusts from 14" to 26". Weight: 95 lbs.

### Frigid Imperial™ Device Head Covers

The perfect product to keep your new Frigid Imperial™ lowering device looking like new! Sturdy black plastic covers fit snugly over the corner heads to protect them from scratches and tarnish. Set of 4 includes 3 solid covers and 1 with crank handle hole.

### Frigid Casket Placer Set

The Frigid Casket Placer Set was designed to provide casket handlers with a safe and effortless way of assuring proper placement of the casket on the lowering device. Our placer set is constructed of strong, chrome-plated brass and steel rubberized rollers. It consists of 4 roller clamps, 1 end roller clamp, 1 end stop clamp and 2 stainless steel guide rods.

### Lowering Device Stand Drapes

Device drapes are available in burgundy, blue and green Hi-Lustre drapery material. All device drapes come with velcro straps for attachment to stand tubing. Drapes are four pieces unless the one-piece wrap around feature is specified. Two styles are available:

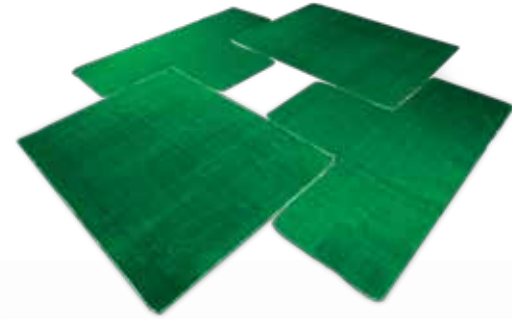

#### Single-Faced

Designed for our non-telescoping device stand.

#### Double-Faced

Twice the thickness of Single-Faced drapes, the plush side of the material is visible both on the outside and the inside of the drape. Available for non-telescoping stands and telescoping stands. Our Double-Faced drapes for telescoping stands are equipped with an internal spring mechanism which allows them to be tapered to conform to the uneven ground in a hillside setup.

## FRIGID LOWERING DEVICE ACCESSORIES

### Gravesite Grass Sets

The original grass sets! Our grass is made of a virtually indestructible, non-absorbent fibrous material that is extremely easy to keep clean and will last for years of set-ups.

#### Mound Cover and Border Set (no liner)

12' x 14' mound cover (in 2 pieces), two 3' x 8' pieces, two 3' x 9' pieces.

#### Grave Border

Two 3' x 8' pieces, two 3' x 9' pieces.

#### T-Style Liner-Border Combo

Two 6' x 8' side pieces and two 3' x 9' T-end pieces with 3' x 3' drops.

#### Mound Cover

12' x 14' cover (in 2 pieces).

#### T-Style Set

12' x 14' mound cover (in 2 pieces), two 6' x 8' side pieces and two 3' x 9' T-end pieces with 3' x 3' drops.

### Device and Chair Covers

Protect your investments from the elements and keep your equipment in the best condition with Frigid's device and chair covers.

### Lowering Device Straps

Frigid lowering device straps are 3 7/8" wide and are available in both green and black poly heat-sealed webbing in any length desired. Standard lengths are as follows:

Strap Length	Grave Depth
15 feet	6 foot
17.5 feet	7 foot
20 feet	8 foot
22.5 feet	9 foot
25 feet	10 foot
27.5 feet	11 foot
30 feet	12 foot

Custom sizes are also available for straps longer than 30 feet.

Our straps have a proven breaking strength of 2000 pounds each. For a small fee we can double-ply the center yard of each long strap for added strength if desired. Just ask for reinforced straps when you order. They can be purchased in pairs (2 long) or in sets (4 short, 2 long).

#### Frigid Full Device Cover

Save hundreds of dollars in repairs and re-polishing. The Frigid Full Device Cover is made of heavy-duty canvas and reinforced with extra heavy-duty canvas at the device corner heads. Featuring four handles for easy carrying, this is a simple way to keep your device in tip-top shape!

### Safety Straps

Our safety straps are made of the same poly heat-sealed nylon webbing as our lowering device straps. Safety straps include rubber covered steel hooks on both ends. Overall length of hook and strap is 56". Strap alone measures 48".

### Safety Chains

Safety chains are for those who want absolutely no risk of accident when lowering a casket. Each of the two steel machine chains are rated at a 545 lb load capacity. Overall length of hook and chain is 68". Chain alone measures 54".

#### Frigid Hi-lustre Chair Covers

Our chair covers are made of traditional hi-lustre fabric either with or without your monogram embroidered on the back. Machine-wash or dry-clean. Please specify fabric color (burgundy, green or blue) when ordering.

## FRIGID CEMETERY EQUIPMENT

### Frigid Hercules Lift: Concrete & Steel Vault Placer

Make placing and lowering even the heaviest concrete and steel vaults and lids a one-person operation with the Frigid Hercules Lift. This is the right piece of equipment for cemetery managers who want to increase efficiency and cut costs! The Hercules is constructed from 1.25" square steel tubing and features large 15" (rim diameter) wheels which make it easy to maneuver over uneven terrain. **Total lifting capacity:** 2300 lbs. **Tire size:** 7.50-14. **Dimensions:** 89" x 55" x 40" (10" from ground to frame). **Weight:** 480 lbs.

### Frigid Streamliner Mobile Stand and Casket Carrier

The Frigid Streamliner is designed to work with a Frigid automatic lowering device and casket placer to give you a graveside setup that is both safe and completely mobile!

The Streamliner enables your set-up, including drape, device and placer set, to remain intact before, during and between burials. Sturdy tires move the Streamliner throughout the cemetery with ease, and the tow bar is removable, allowing for two or more units to be coupled together. The Streamliner will relieve strain on the pallbearers' backs, while two wheel brakes and wheel locks ensure that each burial takes place without mishap. Rubber covered hooks securely hold the casket lowering device to the unit. Consistent use of the Streamliner Mobile Stand & Casket Carrier can lengthen the life of your Frigid lowering device by up to a third!

The Streamliner ships complete with tow bar and one pair of steel channels (drape available at extra charge). The steel channels are placed length-wise on either side of the grave opening and allow the Streamliner to be easily rolled over the grave. **Actual dimensions:** 112" x 53" x 23" **Actual weight:** 450 lbs. **Shipping weight:** 475 lbs.

### Frigid Invincible Pallbearer Casket Carriage

The Frigid Invincible is the best way of providing pallbearers with a dependable method for moving the casket from hearse to graveside without mishap. Built with traditional Frigid quality, the Invincible is as rugged as a tank and runs as smoothly as a fine watch. It is built to last and with proper maintenance will provide care-free service for years. It has a heavy-duty frame of 1 1/2-14 gauge welded steel tubing and extra-large fully pneumatic wheels (4.5" x 10"). Nameplates and drapery are available for further service enhancement. **Actual dimensions:** 72" x 30" x 19" **Actual weight:** 240 lbs. **Shipping dimensions:** 75" x 33" x 23". **Shipping weight:** 260 lbs.
