Omega's full line of databus integration modules and remote start bypass kits offer you ALL of the solutions you need to get the install right the first time.

<<< [CLICK HERE](#) or on the module to the left to view our vehicle compatibility reference guide.

One module interfaces with dozens of vehicles! **One wire** gives you control over the doorlocks, factory alarm functions, even the immobilizer! Omega Databus modules eliminate the need for dozens of relays, resistors, extra ignition keys and countless hours of installation time. These patented multi-vehicle modules cost the same as most single vehicle modules.

Click the button above for a complete demonstration of Databus Integration technology.
