

Monolith Makes it Easy:

Monolith Solar has developed a \$99/mo plan for residential homeowners. With the help from current incentive programs you can now OWN a solar system for less than the cost of your electric bill.

Our Process:

- 1** Consultation
Contact us today for a free consultation
- 2** System Design
- 3** Installation
- 4** Save!

When you purchase a solar energy power system for your home, you have peace of mind in knowing that Monolith will manage all of the paperwork associated with the government rebate programs.

During your consultation Monolith will discuss your energy needs and research your property to design an optimized system that immediately saves you money.

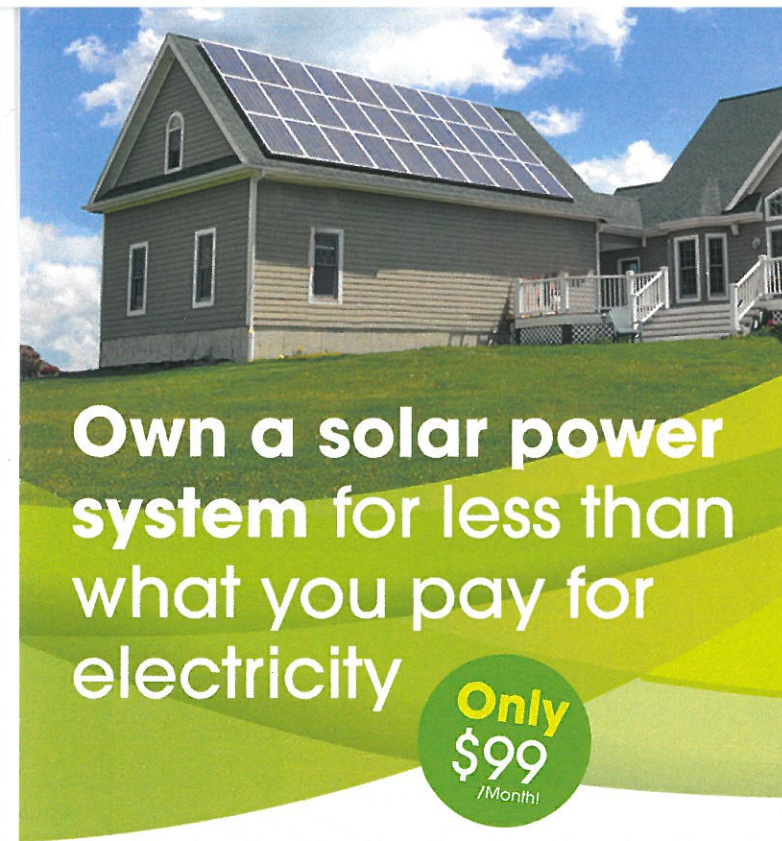

Once your loan has been paid you can say "good-bye" to those high electric bills!

*\$99/month loan payments are less than the approximate \$112 to \$120 energy savings of a Monolith solar energy power system. Pricing and savings vary upon system size, location, utility rates and government rebate programs. Depending upon the system, typical length of loan programs vary between 4.5 and 6 years. Loan programs are subject to credit approval.

Own a solar power system for less than what you pay for electricity

Only \$99 /Month!

A Solar Power System from Monolith:

- Saves you money on your electric bill
- Increases value of your home
- On average, homes sell five times faster
- Decreases harmful impact to the environment
