Material Handling & Packaging Solutions

Ask a Question

Intrepid Collapsible Bulk Containers

Intrepid Collapsible Bulk Containers are designed as a dependable and reusable alternative to one time use corrugated metal bins. They are manufactured from FDA approved food grade plastic, have a 4-way forklift base for easy movement, and are collapsible for easy, space saving return shipping and storage.

Their reusable, plastic construction help eliminate problems such as leakage, shifting off of pallets, debris & dust, and limited one-time use that are associated with their corrugated counterparts. These reusable bulk containers provide a significant cost savings versus one-time use packaging.

They are ideal for use in meat, poultry, liquid, semi-liquid, powder and granular applications.

Available with or without steel reinforcement for added strength and weight capacity.

Optional lid also available.

Intrepid Collapsible Bulk Container Features & Benefits include...[more](#)

	ITEM #	DIMENSIONS (L-W-H)	STYLE	Price	
	BZ48404600	48.1" x 40.1" x 45.9"	without steel reinforcement	\$378.00	<input type="button" value="Add to Cart"/> <input type="button" value="Add to Quote"/>

Easy, quick to assemble and collapse, non-sequential loading side panels.

- Heavy duty design allows up to 2,500 lb weight capacity.
- Ideal for many applications including temporary storage, work in process, incoming ingredients, shipments among plants and shipments to customers.
- Their injection molded design helps prevents leakage.
- No splinters, nails and dust like their corrugated counterparts.
- Secure stacking with or without optional lid
- Easy to repair, don't require any special tools or fasteners.
- One-year limited warranty.
- 100% recyclable.
