CONVERT MORE DOLLARS TO ePAYMENTS, WITH PAY-PLUS® SOLUTIONS, INC.

INTRODUCING

Select+
an INTEGRATED PAYMENT ENGINE

Select+™ is an integrated payment engine using a virtual MasterCard®. This no type, no swipe CORE®-certified payment settles payments directly into Providers' merchant accounts in an ACA-compliant format.

Created specifically for the healthcare industry, Select+ was designed to address Providers' most common concerns regarding traditional virtual card payments:

"Takes Too Long to Enter" – *Solved with Select+*

With *Select+*, Providers gain more operational efficiencies versus traditional virtual cards. From issuance to settlement, the payment process is 100% automatic and virtual.

"Difficult to Reconcile" – *Solved with Select+*

With *Select+*, payment is settled as an ACA-compliant ACH-CCD+ in the Provider's merchant account with the Re-association Trace Number for a simplified match to the 835 or EOP.

"Processing Fees are Too High" – *Solved with Select+*

With *Select+*, Pay-Plus takes on the role for both card issuer and acquirer. Gaining control of this process allows Pay-Plus the ability to offer competitive processing rates to Providers.

This game-changing innovation enables Payers to offer a payment option designed to improve Provider efficiencies, leading to increased enrollment in electronic payments.
