## Build Your Solution

### Start with the CORRIDOR Foundation.

Your CORRIDOR solution is built upon a fully functional foundation of essential features:

Work Order	Inventory	Companies, Contacts & Aircraft	Procurement	Shipping & Receiving	Pricing	Barcoding	CORRIDOR Mobile Mechanic	Accounting Integration
------------	-----------	--------------------------------	-------------	----------------------	---------	-----------	--------------------------	------------------------

The CORRIDOR Foundation supports standard business processes critical to the operation of any aviation repair organization. It integrates seamlessly with all combinations of the Process Modules below to provide a tailored solution delivering real-time status visibility, smooth process transitions, and seamless interdepartmental communication.

### Add Your Process Modules.

Add a selection of CORRIDOR's Process Modules to tailor a comprehensive solution specifically for your organization:

#### Maintenance, Sales, Planning & Shop Management

Work Order Quote	Training & Qualifications	Time & Attendance	Planning & Scheduling	Tool Crib
------------------	---------------------------	-------------------	-----------------------	-----------

#### Part Sales & Retail Distribution

Sales Order	Sales Order Quote	Rentals
-------------	-------------------	---------

#### Aircraft Maintenance Record Keeping

Regulatory Compliance	Maintenance Records Integration	Flight Operations Integration
-----------------------	---------------------------------	-------------------------------

#### Fueling & Concierge

Line Sales Suite
------------------

#### Additional Process Modules

Rotable Management	Multi-Currency
--------------------	----------------

### Integrate and Optimize.

#### Accounting Integration

Accounting Integration within CORRIDOR expedites the free flow of information between CORRIDOR and third-party accounting systems.

#### APIs / SDK

CORRIDOR's Application Programming Interface (API) is available via SDK (Software Developer's Kit) to facilitate integrating CORRIDOR into your expanded IT environment.

#### Editions

CORRIDOR is available in 2 Editions: Workgroup for single location facilities or companies with multiple independently operating entities. Enterprise for multiple location organizations requiring enterprise-wide optimization and centralized processing features.

Founded upon decades of direct aviation experience and a strong technology backbone, Continuum Applied Technology is the future of service delivery in the aviation industry. Its flagship software product, CORRIDOR, establishes this commitment by directly impacting service efficiency, safety, customer service, and profit. Continuum prides itself on listening to each business and understanding individual needs along with the requirements of the industry as a whole.

CORRIDOR is an enterprise software application designed for any aviation service provider in the industry from FBOs and Repair Stations to Distributors and Flight Departments. CORRIDOR dramatically improves process and information flow throughout any organization by eliminating manual efforts, reducing redundancy, lowering costs, improving speed, and enabling employees to perform higher levels of direct service. CORRIDOR consists of integrated software Modules, which include Company Database, Contact Management, Inventory, Sales Order, Work Order, Rotable Management, Accounting Integration, Line Sales & Management, Regulatory Compliance, and more. CORRIDOR handles all business functions and operations in real time, and all transaction information is available at any level of detail required at any time.
