20,90 €

Slumber Animals

- Highest quality & longevity
- Fine cotton-velour materials
- High-quality polyester hollow fibre filling

Orthopaedically meaningful!

We at THERALINE, as one of the leading manufacturers of breastfeeding and bedding pillows, have put all our experience into the development of new child sleeping pillows. The slumber animals were developed in close co-operation with physiotherapists, taking anatomical criteria into account. The ergonomic shape of the slumber animals means that the spinal column does not buckle in the neck and the hip areas when in a lateral position. Postural deformity is prevented in this way! Your child will sleep more relaxed and does not use its covers to lie down comfortably. All slumber animals have a removable and washable cover made of high-quality cotton-velour plush. The very high-quality filling with polyester hollow fibre balls is cuddly, durable and noiseless. The filling material is certified according to the Okötex standard and practically free of allergens
