

## No compromise Telematics

Coretex develops and supplies world-class mobile asset management solutions that help logistics and transport operations to intelligently optimise their business through the smarter use of real-time information. We're high-tech, global and fast-growing with fantastic people, a startup culture and a can-do spirit that's taking on the best in the industry.

**Industry expertise**  
Expertise where it counts in your industry

**High definition telematics**  
Granular data drives precise decision making capability

**Real-time insights**  
Greater control of assets to make actionable business decisions

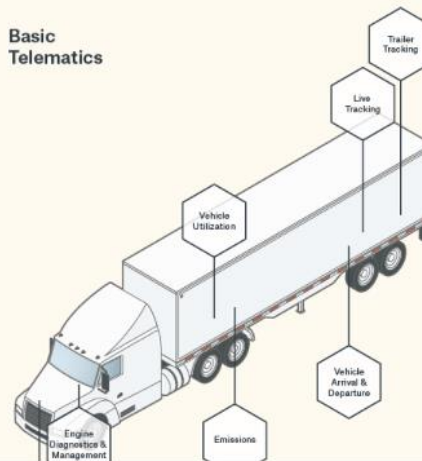

**Automated intelligence**  
Next generation contextually aware action engine automates intelligent actions in real time to manage by exception

**Trust**  
Coretex is a critical and long term trusted partner

### High Definition Telematics

### Basic Telematics

### Optimise Asset Utilisation

**Maximise the use of your assets through real-time information on the status of your entire fleet:**

- Allocate additional jobs to the nearest vehicle with capacity
- Balance the use of assets across your fleet
- Assess downtime through knowing which fleet assets are idle and for how long
- Support claims by knowing exact in/out and waiting times

### Improve Safety

**Encourage safer driving and eliminate incidents through in-cab, instantaneous feedback:**

- Monitor driver behaviour such as performance against posted speed, cornering, braking and accelerating
- Information delivered to driver and fleet operators
- The ideal tool to build your driver training, and incentive programmes

### Improve Customer Service

**Take customer experience to improved levels:**

- Easily produce load and trip reports and send them to your customers
- Better informed and prepared customers increases customer loyalty
- Substantially reduce claims for perished or damaged goods
- Better vehicle scheduling and route planning, improving your delivery time accuracy

### Reduce Fuel & Maintenance Costs

**Driver behaviour:**

- Driver behaviour has a major impact on fuel usage and assets wear and tear. Train and incentivise better driving for reduced fuel & maintenance costs
- Coretex solution provide detailed driver behaviour reporting and alerting and delivers drivers immediate feedback and can be used to train and incentivise better driving

**Alerts, notifications & reporting:**

- Be alerted to issues before they occur and notified of faults that require critical action
- The Coretex solution offers direct engine diagnostics alerts allowing you to monitor and assess your engine performance in real time
- The solution also provides information such as excessive fuel consumption and idling periods. Saving you time and money, keeping your fleet operating at maximum efficiency

### Reduce your costs and save money with eRUC

**The ibright® eRUC system is designed for New Zealand market conditions, allowing owner drivers and fleet owners to reduce costs and save money with the ibright® eRUC system**

- Do away with unreliable hubodometers - the ibright® eRUC system is all electronic
- Lower your RUC administration costs - we are an approved online NZTA RUC agent
- Maximise your off-road claims (ibright® eRUC leads the industry in off-road claims), meaning more money in your pocket
- Compatibility with the ibright® CHECK-MATE unit for maximum on-road safety and driver convenience

### Meet Compliance Regulations

**Reduce cost and save time with the most advanced electronic Road User Charge system:**

- Designed for New Zealand market conditions
- Stay RUC compliant
- Automated licence renewal process

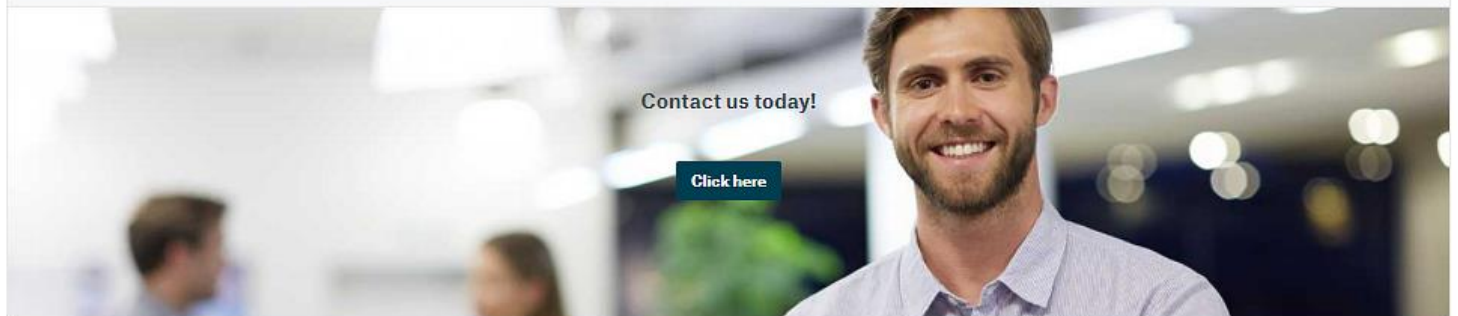

**Electronic Driver Logs - Do away with time consuming paper-based reporting to reduce cost and eliminate mistakes:**

- Ensure compliance with new safety regulations
- Drivers are driving instead of doing paperwork
- Manage driver fatigue

**Electronic Pre- and Post-Drive Check - Ensure your drivers meet compliance regulations with confirmed and documented drive checks:**

- Automated and easy to use
- Helping drivers stay compliant easily and efficiently
